Global X U.S. Electrification UCITS ETF (ZAPP)

A fund that seeks to provide exposure to companies that potentially stand to benefit from the increased electricity demand and electrification within the United States.

For Professional Investors only

INTRODUCTION

U.S. electrification is the structural shift to electricity as the primary energy source across transportation, industry, buildings, and digital infrastructure.¹ Rising power demand from electric vehicles, data centres, advanced manufacturing, and grid modernisation, requires significant investment to expand generation capacity, upgrade transmission networks, and deploy enabling technologies.² This multi-decade transformation could reshape the country's energy system while improving efficiency, resilience, and economic growth.³

Grid infrastructure and power technologies are complementary pillars within this ecosystem. Utilities, equipment manufacturers, grid component suppliers, and energy management providers are central to expanding and modernising the electricity network.⁴ By enhancing capacity, reliability, and energy distribution, they could play a critical role in meeting rising electricity demand and supporting the continued electrification of the U.S. economy.⁵

ZAPP LN seeks to provide exposure to companies engaged in conventional and alternative electricity generation, transmission and distribution, as well as those involved in the development, manufacturing, deployment, or modernisation of grid infrastructure and smart grid technologies.

DID YOU KNOW?

- A single ChatGPT query can require ~10x the energy of a typical Google search.⁶
- U.S. electricity demand could increase by up to 50% by 2040.⁷
- The U.S. Department of Energy projects that data centres could consume as much as 12% of U.S. electricity by 2028, almost 3x higher than its 4.4% share in 2023.⁸
- Deloitte projects that total industry investment in the U.S. power sector could reach roughly \$1.4 trillion between 2025 and 2030 to fund rising demand, grid upgrades, and modernisation - equivalent to the sector's investment over the prior 12 years.⁹

Capital at Risk. All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed.

FUND INVESTMENT APPROACH

- The Global X U.S. Electrification UCITS ETF (ZAPP) seeks to provide exposure to companies that potentially stand to benefit from the increased electricity demand and electrification within the United States. This includes companies that are involved in conventional electricity generation, transmission, and distribution; alternative electricity generation and technology solutions; and the modernisation, development, manufacturing, or implementation of grid infrastructure and smart grid technology.
- Mirae Asset Global Indices has identified the following three sub-themes that aim to collectively capture the most relevant themes from the U.S. Electrification value chain:
 - Conventional Electricity**
 - Alternative Electricity**
 - Grid Infrastructure and Smart Grid Technologies**
- Holdings are separated into Significant-, Pure- and Diversified-Play. **Significant-Play** are those companies earning greater than or equal to 75% of revenue attributable to one of more of the core businesses of the sub-themes in aggregate.
- Pure-Play** are those companies earning greater than or equal to 50% of revenue attributable to one of more of the core businesses of the sub-themes in aggregate.
- Diversified-Play** are those companies earning between 25% and 50% of revenue attributable to one of more of the core businesses of only that applicable sub-theme.
- Constituent are determined based on their free-float market capitalisation. Individual weights are capped at 4%, and the aggregate weight of the Diversified Play are capped at 20%.
- The index is reconstituted and rebalanced on a semi-annual basis.

A STRONG DEMAND GROWTH OUTLOOK AFTER 20 YEARS OF FLAT GROWTH?

Disclosures

The Global X UCITS ETFs are regulated by the Central Bank of Ireland.

This is a marketing communication. Please refer to the relevant prospectus, supplement, and the Key Information Document ("KID") of the relevant UCITS ETFs before making any final investment decisions. Investors should also refer to the section entitled "Risk Factors" in the relevant prospectus of the UCITS ETFs in advance of any investment decision for information on the risks associated with an investment in the UCITS ETFs, and for details on portfolio transparency. The relevant prospectus and KID for the UCITS ETFs are available in English at www.globalxetfs.eu/funds.

Investment in the UCITS ETFs concern the purchase of shares in the UCITS ETFs and not in a given underlying asset such as a building or shares of a company, as these are only the underlying assets that may be owned by the UCITS ETFs.

A UCITS ETF's shares purchased on the secondary market cannot usually be sold directly back to a UCITS ETF. Investors must buy and sell shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying shares and may receive less than the current net asset value when selling them. Changes in exchange rates may have an adverse effect on the value price or income of the UCITS ETF. Past performance of a UCITS ETF does not predict future returns. Future performance is subject to taxation which depends on the personal situation of each investor, and which may change in the future. Neither past experience nor the current situation are necessarily accurate guides to the future growth in value or rate of return of a UCITS ETF. Investment may be subject to sudden and large falls in value, and, if it is the case, the investor could lose the total value of the initial investment. Income may fluctuate in accordance with market conditions and taxation arrangements. The difference at any one time between the sale and repurchase price of a share in the UCITS ETF means that the investment should be viewed as medium term to long term.

Any investment in a UCITS ETF may lead to a financial loss. The value of an investment can reduce as well as increase and, therefore, the return on the investment will be variable. Global X ETFs ICAV is an open-ended Irish collective asset management vehicle issuing under the terms of its prospectus and relevant supplements as approved by the Central Bank of Ireland and is the issuer of certain of the ETFs where stated.

Global X ETFs ICAV II is an open-ended Irish collective asset management vehicle issuing under the terms of its prospectus and relevant supplements as approved by the Central Bank of Ireland and is the issuer of certain of the ETFs where stated.

Communications issued in the European Union relating to Global X UCITS ETFs are issued by Global X Management Company (Europe) Limited ("GXM Europe") acting in its capacity as management company of Global X ETFs ICAV. GXM Europe is authorised and regulated by the Central Bank of Ireland. GXM Europe is registered in Ireland with registration number 711633.

Communications issued in the United Kingdom and Switzerland relating to Global X UCITS ETFs are issued by Global X Management Company (UK) Limited ("GXM UK"), which is authorised and regulated by the Financial Conduct Authority. The registered office of GXM UK is 77 Coleman St, London EC2R 5BJ. Information about GXM UK can be found on the Financial Services Register (register number 965081).

Information for Investors in the United Kingdom

Please refer to the relevant prospectus, supplement, and the Key Investor Information Document ("KIID") of the relevant UCITS ETFs before making any final investment decisions. These are available in English at www.globalxetfs.eu. The Financial Ombudsman Service is unlikely to consider complaints relating to the ETF and any claims for losses relating to the manager and the Depositary of the ETF are unlikely to be covered under the Financial Services Compensation Scheme.
