

Global X Artificial Intelligence UCITS ETF

AIQU LN

IE0000XTDDA8

A fund that seeks to invest in companies that may stand to benefit from the further development and utilisation of artificial intelligence (AI) technology in their products and services, as well as in companies that provide hardware facilitating the use of AI for the analysis of big data.

For Professional Investors only

AI's broad applicability represents a major platform shift poised to significantly influence technology adoption across the entire economy.

Roughly 56% of companies utilise AI in their operations today, but most have only engaged in limited implementation, representing a significant opportunity for greater integration.¹ In industries like healthcare, cybersecurity, manufacturing, and transportation for example, AI can improve service delivery, identify system weaknesses, personalise customer experiences, and foster new product development.

Overall, AI could contribute up to \$16 trillion to global GDP in 2030 with roughly \$9 trillion originating from consumption side-effects and the other \$7 trillion coming from increased productivity and efficiency (see chart below).² For context, that would equate to almost 14% of global GDP, more than the combined growth of China and India today.³ AIQU LN is designed to capture the performance of companies that are either at the forefront of the AI revolution or producing the hardware which is underpinning the analysis of Big Data.

DID YOU KNOW?

- 56% of businesses are now utilising AI to improve their business operations.⁴
- AI technology is expected to create 12 million more jobs than it is expected to replace.⁵
- Spurred by breakthroughs in generative AI, forecasts suggest the global artificial intelligence market could increase more than 300x from \$39bn in 2022 to \$1.3tn by 2032.⁶
- AI is quickly expanding beyond data centres, enabling innovative commercial applications in diverse sectors, including Agriculture, Health Care, and beyond. Forecasts indicate that over 729mm individuals will use AI tools by 2030, up 254mm from 2023.⁷

AI's RAPID ADVANCEMENT COULD ADD \$16 TRILLION TO THE GLOBAL ECONOMY BY 2030

Initial growth will primarily stem from productivity gains before gradually shifting to an expansion driven by increased consumer demand

SFDR Classification	Article 6
Underlying Index	Indxx Artificial Intelligence Index

Registered Countries:

Austria, Denmark, Finland, Germany, Ireland, Italy, Luxembourg, Netherlands, Norway, Spain, Sweden, Switzerland, United Kingdom,

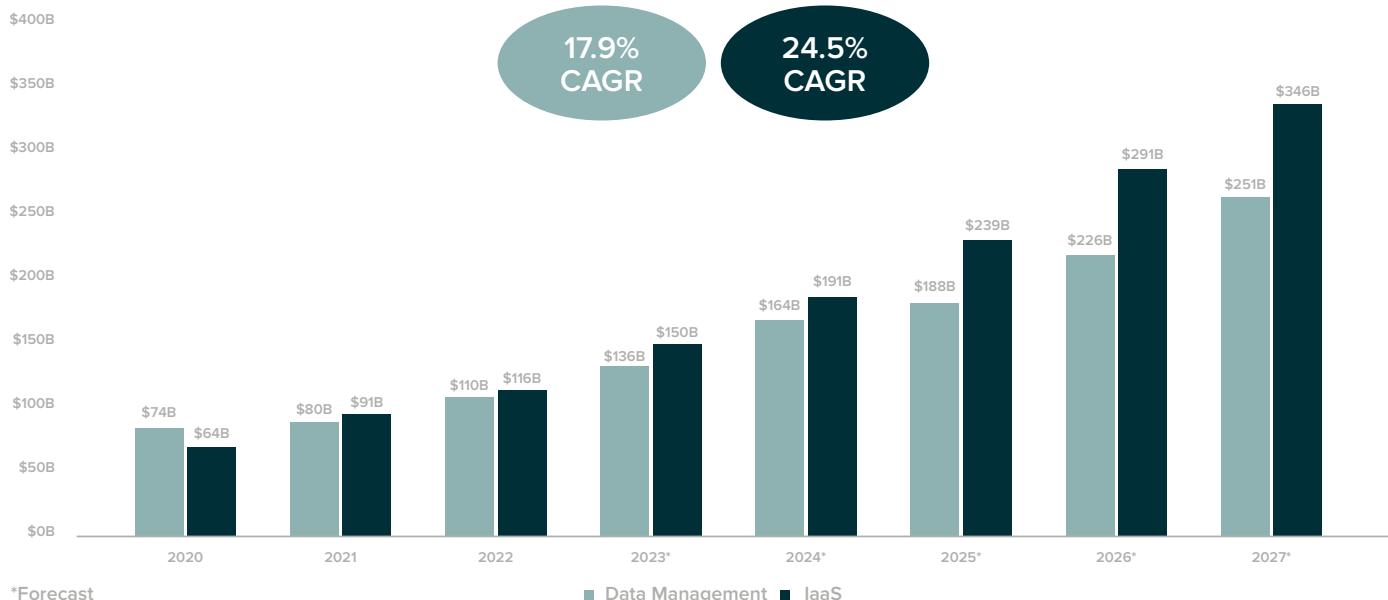

FUND INVESTMENT APPROACH

- The Global X Artificial Intelligence UCITS ETF (AIQU LN) aims to invest in the companies seemingly poised to benefit from the development and utilisation of AI technology in their products and services, as well as companies that produce essential hardware used in AI applied to the analysis of Big Data.
- Indxx has identified the following categories that provide exposure to the underlying theme:
 - Category 1**
 - Artificial Intelligence Developers – develop AI and use AI in their own products
 - Artificial Intelligence-as-a-Service (“AlaaS”) – provide artificial intelligence capabilities to their customers as a service.
 - Category 2**
 - Artificial Intelligence Hardware - produce semiconductors, memory storage, and other hardware that is utilised for artificial intelligence applications.
 - Quantum Computing - develop quantum computing technology
- The top 60 companies from Category 1 and the top 25 companies from Category 2 form the final index.
- Each component with an Exposure Score >20% is subject to maximum weight of 3%, components with Exposure Score <20% have a maximum weight of 1%.
- The final index will include 85 companies from Category 1 and 2 ranked by their respective company market capitalisation.
- Components are rebalanced semi-annually.

AI IMPLEMENTATION BENEFITS CLOUD INFRASTRUCTURE PROVIDERS AND DATA SOLUTIONS SUPPLIERS

Disclosures

The Global X UCITS ETFs are regulated by the Central Bank of Ireland.

This is a marketing communication. Please refer to the relevant prospectus, supplement, and the Key Information Document ("KID") of the relevant UCITS ETFs before making any final investment decisions. Investors should also refer to the section entitled "Risk Factors" in the relevant prospectus of the UCITS ETFs in advance of any investment decision for information on the risks associated with an investment in the UCITS ETFs, and for details on portfolio transparency. The relevant prospectus and KID for the UCITS ETFs are available in English at www.globalxetfs.eu/funds.

Investment in the UCITS ETFs concern the purchase of shares in the UCITS ETFs and not in a given underlying asset such as a building or shares of a company, as these are only the underlying assets that may be owned by the UCITS ETFs.

A UCITS ETF's shares purchased on the secondary market cannot usually be sold directly back to a UCITS ETF. Investors must buy and sell shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying shares and may receive less than the current net asset value when selling them. Changes in exchange rates may have an adverse effect on the value price or income of the UCITS ETF. Past performance of a UCITS ETF does not predict future returns. Future performance is subject to taxation which depends on the personal situation of each investor, and which may change in the future. Neither past experience nor the current situation are necessarily accurate guides to the future growth in value or rate of return of a UCITS ETF. Investment may be subject to sudden and large falls in value, and, if it is the case, the investor could lose the total value of the initial investment. Income may fluctuate in accordance with market conditions and taxation arrangements. The difference at any one time between the sale and purchase price of a share in the UCITS ETF means that the investment should be viewed as medium term to long term.

Any investment in a UCITS ETF may lead to a financial loss. The value of an investment can reduce as well as increase and, therefore, the return on the investment will be variable. Global X ETFs ICAV is an open-ended Irish collective asset management vehicle issuing under the terms of its prospectus and relevant supplements as approved by the Central Bank of Ireland and is the issuer of certain of the ETFs where stated.

Global X ETFs ICAV II is an open-ended Irish collective asset management vehicle issuing under the terms of its prospectus and relevant supplements as approved by the Central Bank of Ireland and is the issuer of certain of the ETFs where stated.

Communications issued in the European Union relating to Global X UCITS ETFs are issued by Global X Management Company (Europe) Limited ("GXM Europe") acting in its capacity as management company of Global X ETFs ICAV. GXM Europe is authorised and regulated by the Central Bank of Ireland. GXM Europe is registered in Ireland with registration number 711633.

Communications issued in the United Kingdom and Switzerland relating to Global X UCITS ETFs are issued by Global X Management Company (UK) Limited ("GXM UK"), which is authorised and regulated by the Financial Conduct Authority. The registered office of GXM UK is 77 Coleman St, London, EC2R 5BJ, UK. Information about GXM UK can be found on the Financial Services Register (Firm Reference Number 965081). GXM Europe may terminate marketing arrangements.

Information for Investors in the United Kingdom

Please refer to the relevant prospectus, supplement, and the Key Investor Information Document ("KIID") of the relevant UCITS ETFs before making any final investment decisions. These are available in English at www.globalxetfs.eu The Financial Ombudsman Service is unlikely to consider complaints relating to the ETF and any claims for losses relating to the manager and the Depositary of the ETF are unlikely to be covered under the Financial Services Compensation Scheme.
