

Global X ETFs Capital Markets Team

Dedicated Team on hand to offer support and expertise on ETF trading and liquidity.

At Global X we understand that simple, cost efficient execution of your ETF trade can be just as important as the performance of the ETF itself. As such, the team is available for all enquiries related to buying or selling Global X ETFs.

Pre-Trade Analysis

Liquidity analysis looking at both primary and secondary market liquidity on and off exchange and expected trade costs and market impact for buy, sell or switch trades.

APs and Liquidity Providers

The Team can link investors to the best sources of liquidity with connections to all key ETF liquidity providers in Europe, facilitating access to market axes and inventory.

Market Surveillance

Monitoring secondary market spreads, volumes and trading activity across all exchanges and venues, the Team can help with market colour, trend analytics and ETF flows.

The value of an investment in ETFs may go down as well as up and past performance is not a reliable indicator of future performance.

Trading in ETFs may not be suitable for all types of investors as they carry a high degree of risk. You may lose all of your initial investment. Only speculate with money you can afford to lose. Changes in exchange rates may also cause your investment to go up or down in value. Tax treatment depends on the individual circumstances of each client and may be subject to change in the future. Please ensure that you fully understand the risks involved. If in any doubt, please seek independent financial advice. Investors should refer to the section entitled "Risk Factors" in the relevant prospectus for further details of these and other risks associated with an investment in the securities offered by the Issuer.
