

# Global X Silver Miners UCITS ETF

COMMODITIES

## SILV LN

IE000UL6CLP7

A fund that seeks to invest in pure-play silver mining companies that generate significant revenues through mining, exploration, and refining activities.

For Professional Investors only.

Due to its monetary and industrial exposure, silver possesses a unique set of sensitivities to express macroeconomic views.

With exceptional characteristics in conductivity, ductility, and light sensitivity, silver has become indispensable in various industries, including the growing need in nuclear reactors, semiconductors, touch screens and water purification.

Its dual nature presents opportunities for potential appreciation during periods of heightened demand for precious metals and economic growth. **SILV LN** strategically covers the entire spectrum of silver mining, from exploration to refining, potentially capitalising on the value and industrial potential of this precious metal.

### DID YOU KNOW?

- Silver has maintained its demand momentum, notably in the Electrical sector, up ~51% since 2016, largely due to photovoltaic\* (solar)'s 140% surge in the same time period.<sup>1</sup> This represents a shift in demand makeup in favour of electrical industrial applications that now represents ~60% of total demand.
- The Americas, including Mexico, Peru, and Chile, account for ~56% of global silver production, while China, Australia, and Russia contribute ~22%. This diversification of production sources may ensure stability in supply.
- ~28% of silver comes from primary production, while the remaining 72% is obtained as a by-product during the extraction of metals, such as gold, copper, lead, and zinc.
- Investing in silver miners may offer a leveraged play on silver prices. These companies can expand production as profit margins grow, allowing investors to potentially capitalise on silver's price appreciation.

## Disclosures

The Global X UCITS ETFs are regulated by the Central Bank of Ireland.

This is a marketing communication. Please refer to the relevant prospectus, supplement, and the Key Information Document (“KID”) of the relevant UCITS ETFs before making any final investment decisions. Investors should also refer to the section entitled “Risk Factors” in the relevant prospectus of the UCITS ETFs in advance of any investment decision for information on the risks associated with an investment in the UCITS ETFs, and for details on portfolio transparency. The relevant prospectus and KID for the UCITS ETFs are available in English at [www.globalxetfs.eu/funds](http://www.globalxetfs.eu/funds).

Investment in the UCITS ETFs concern the purchase of shares in the UCITS ETFs and not in a given underlying asset such as a building or shares of a company, as these are only the underlying assets that may be owned by the UCITS ETFs.

A UCITS ETF's shares purchased on the secondary market cannot usually be sold directly back to a UCITS ETF. Investors must buy and sell shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying shares and may receive less than the current net asset value when selling them. Changes in exchange rates may have an adverse effect on the value price or income of the UCITS ETF. Past performance of a UCITS ETF does not predict future returns. Future performance is subject to taxation which depends on the personal situation of each investor, and which may change in the future. Neither past experience nor the current situation are necessarily accurate guides to the future growth in value or rate of return of a UCITS ETF. Investment may be subject to sudden and large falls in value, and, if it is the case, the investor could lose the total value of the initial investment. Income may fluctuate in accordance with market conditions and taxation arrangements. The difference at any one time between the sale and repurchase price of a share in the UCITS ETF means that the investment should be viewed as medium term to long term.

Any investment in a UCITS ETF may lead to a financial loss. The value of an investment can reduce as well as increase and, therefore, the return on the investment will be variable. Global X ETFs ICAV is an open-ended Irish collective asset management vehicle issuing under the terms of its prospectus and relevant supplements as approved by the Central Bank of Ireland and is the issuer of certain of the ETFs where stated.

Global X ETFs ICAV II is an open-ended Irish collective asset management vehicle issuing under the terms of its prospectus and relevant supplements as approved by the Central Bank of Ireland and is the issuer of certain of the ETFs where stated.

Communications issued in the European Union relating to Global X UCITS ETFs are issued by Global X Management Company (Europe) Limited (“GXM Europe”) acting in its capacity as management company of Global X ETFs ICAV. GXM Europe is authorised and regulated by the Central Bank of Ireland. GXM Europe is registered in Ireland with registration number 711633.

Communications issued in the United Kingdom and Switzerland relating to Global X UCITS ETFs are issued by Global X Management Company (UK) Limited (“GXM UK”), which is authorised and regulated by the Financial Conduct Authority. The registered office of GXM UK is 77 Coleman St, London EC2R 5BJ. Information about GXM UK can be found on the Financial Services Register (register number 965081).

## Information for Investors in the United Kingdom

Please refer to the relevant prospectus, supplement, and the Key Investor Information Document (“KIID”) of the relevant UCITS ETFs before making any final investment decisions. These are available in English at [www.globalxetfs.eu](http://www.globalxetfs.eu). The Financial Ombudsman Service is unlikely to consider complaints relating to the ETF and any claims for losses relating to the manager and the Depositary of the ETF are unlikely to be covered under the Financial Services Compensation Scheme.
