Sección del sitio web «Resumen»

Nombre completo del (sub)fondo sujeto al artículo 8:	Resumen
Global X Clean Water UCITS ETF	<p>El Fondo promueve la inversión en empresas con operaciones comerciales en el suministro de agua limpia («Empresas de agua limpia») replicando el Índice Solactive Global Clean Water Industry v2. (el «Índice»).</p> <p>El Fondo tratará de replicar el rendimiento del Índice, con sujeción a la deducción de comisiones y gastos, invirtiendo principalmente en una cartera de valores de renta variable que, en la medida de lo posible y factible, conste de los valores que conforman el Índice en proporciones similares a sus ponderaciones en el propio Índice y en los Certificados de Depósito Estadounidenses (American Depositary Receipts, «ADR») y los Certificados de Depósito Globales (Global Depositary Receipts, «GDR») basados en los valores del Índice.</p> <p>Las Empresas de agua limpia, según la definición de Solactive AG, el proveedor del Índice (el «Proveedor del Índice»), son aquellas empresas que obtienen al menos el 50 % de sus ganancias, ingresos operativos o activos a partir de las siguientes actividades comerciales: (1) Tratamiento, reciclaje (incluida la recuperación de agua), purificación y conservación de aguas industriales; (2) almacenamiento, transporte, medición e infraestructura de distribución de agua; (3) producción de productos de calefacción y purificadores de agua domésticos y comerciales; y (4) aporte de actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no perjudique significativamente ningún objetivo medioambiental o social y que las empresas objeto de la inversión sigan buenas prácticas de gobernanza.</p> <p>El Índice se pondera de acuerdo con las calificaciones propias ASG del Proveedor del Índice. El Proveedor del Índice, en asociación con el proveedor de datos ASG Minerva, revisa trimestralmente cada componente del Índice para comprobar el cumplimiento de los principios del Pacto Mundial de las Naciones Unidas, así como la participación en la producción de productos controvertidos. Minerva define los productos controvertidos como productos que representan un riesgo sustancial debido a que una gran parte de los inversores los perciben como ofensivos, vergonzosos, perjudiciales, socialmente inaceptables o éticamente censurables. Cualquier componente existente o potencial del Índice que no cumpla con los estándares laborales, de derechos humanos, ambientales y de lucha contra la corrupción definidos por los Principios del Pacto Mundial de las Naciones Unidas, o que incumpla los umbrales establecidos para la participación en productos controvertidos, a partir de la revisión trimestral, se excluirá del Índice, según lo determine el Proveedor del Índice.</p>
Global X CleanTech UCITS ETF	<p>El Fondo promueve la inversión en empresas cotizadas en bolsa que están posicionadas para beneficiarse de una mayor adopción de tecnologías centradas en mejorar la eficiencia de la producción de energía renovable y/o mitigar los efectos medioambientales adversos del consumo de recursos («CleanTech»), incluidas, entre otras, empresas cuyo negocio principal es desarrollar tecnología relacionada con energías renovables, eficiencia energética y almacenamiento, red inteligente, baterías de iones de litio y/o pilas de combustible, y/o la prevención/mejora de la contaminación (conjuntamente, «Empresas CleanTech»), según la definición de Indxx LLC, (el «Proveedor del Índice») del Índice Indxx Global CleanTech v2 (el «Índice»).</p>

Global X Management Company (Europa) Limited

	<p>El Fondo tratará de replicar el rendimiento del Índice, con sujeción a la deducción de comisiones y gastos, invirtiendo principalmente en una cartera de valores de renta variable que, en la medida de lo posible y factible, conste de los valores que conforman el Índice en proporciones similares a sus ponderaciones en el propio Índice y en los Certificados de Depósito Estadounidenses (American Depositary Receipts, «ADR») y los Certificados de Depósito Globales (Global Depositary Receipts, «GDR») basados en los valores del Índice.</p> <p>El Índice se pondera de acuerdo con las calificaciones propias ASG del Proveedor del Índice. El Proveedor del Índice, en asociación con el proveedor de datos ASG Minerva, revisa trimestralmente cada componente del Índice para comprobar el cumplimiento de los principios del Pacto Mundial de las Naciones Unidas, así como la participación en la producción de productos controvertidos. Minerva define los productos controvertidos como productos que representan un riesgo sustancial debido a que una gran parte de los inversores los perciben como ofensivos, vergonzosos, perjudiciales, socialmente inaceptables o éticamente censurables. Cualquier componente existente o potencial del Índice que no cumpla con los estándares laborales, de derechos humanos, ambientales y de lucha contra la corrupción definidos por los Principios del Pacto Mundial de las Naciones Unidas, o que incumpla los umbrales establecidos para la participación en productos controvertidos, a partir de la revisión trimestral, se excluirá del Índice, según lo determine el Proveedor del Índice.</p>
Global X Hydrogen UCITS ETF	<p>El Fondo promueve la inversión en empresas posicionadas para beneficiarse en mayor medida de avances en el campo de la tecnología de hidrógeno.</p> <p>La tecnología de hidrógeno incluye productos y servicios centrados en el desarrollo y la implementación de gas hidrógeno como fuente de combustible renovable.</p> <p>Específicamente, el Fondo tratará de replicar el rendimiento del Índice Solactive Global Hydrogen v2 (el «Índice») que incluirá valores emitidos por «Empresas de hidrógeno» según lo definido por Solactive AG, (el «Proveedor del Índice») como aquellas empresas que obtienen al menos el 50 % de sus ganancias, ingresos operativos o activos a partir de las siguientes actividades comerciales: 1. Producción de hidrógeno: Empresas involucradas en la producción, el transporte, el almacenamiento y la distribución de hidrógeno (incluido hidrógeno renovable) que se puede utilizar como fuente de energía. 2. Celdas de combustible de hidrógeno: Empresas que desarrollan y/o fabrican celdas de combustible (y sus componentes) que convierten energía química en electricidad y calor, impulsadas por combustible de hidrógeno y/o gas rico en hidrógeno reformado. 3. Tecnología de hidrógeno: Empresas involucradas en la producción de electrolizadores de hidrógeno (que producen gas hidrógeno a partir del agua), tanques y tuberías, infraestructura comercial y residencial, generadores, motores y vehículos alimentados por celdas de combustible de hidrógeno, así como estaciones de combustible de hidrógeno. 4. Integración del hidrógeno: Empresas que prestan servicios de ingeniería y consultoría para la adopción y utilización de fuentes de combustible y/o energía basadas en hidrógeno a nivel residencial, comercial e industrial.</p> <p>Además, las empresas identificadas por el Proveedor del Índice por obtener más del 0 % pero menos del 50 % de las ganancias a partir de las actividades comerciales descritas anteriormente («Empresas de hidrógeno sin ingresos»), así como las empresas identificadas por el Proveedor del Índice por tener operaciones comerciales principales en las actividades comerciales descritas anteriormente, pero que actualmente no generan ingresos («Empresas de hidrógeno sin ingresos»), son aptas para incluirse en el Índice. Además, las Empresas de hidrógeno diversificadas y las Empresas de hidrógeno sin ingresos están sujetas a un límite de ponderación individual del 2 % y un límite de ponderación agregada del 10 % en cada reajuste semestral.</p> <p>El Fondo tratará de replicar el rendimiento del Índice, con sujeción a la deducción de comisiones y gastos, invirtiendo principalmente en una cartera de valores de renta variable que, en la medida de lo posible y factible, conste de los valores que conforman el Índice en proporciones similares a sus ponderaciones en el propio Índice y en los Certificados de Depósito Estadounidenses (American Depositary Receipts, «ADR») y los Certificados de Depósito Globales (Global Depositary Receipts, «GDR») basados en los valores del Índice.</p> <p>El Índice se pondera de acuerdo con las calificaciones propias ASG del Proveedor del Índice. El Proveedor del Índice, en asociación con el proveedor de datos ASG Minerva, revisa trimestralmente cada componente del Índice para comprobar el cumplimiento de los principios del Pacto Mundial de las Naciones Unidas, así como la participación en la producción de productos controvertidos. Minerva define los productos controvertidos como productos que representan un riesgo sustancial debido a que una gran parte de los inversores los perciben como ofensivos, vergonzosos, perjudiciales, socialmente inaceptables o éticamente censurables. Cualquier componente existente o potencial del Índice que no cumpla con los estándares laborales, de derechos humanos, ambientales y de lucha contra la corrupción definidos por los Principios del Pacto Mundial de las Naciones Unidas, o que incumpla los umbrales establecidos para la participación en productos controvertidos, a partir de la revisión trimestral, se excluirá del Índice, según lo determine el Proveedor del Índice.</p>
Global X Renewable Energy Producers UCITS ETF	<p>El Fondo promueve la inversión en fuentes renovables, incluidas la energía eólica, solar, hidroeléctrica, geotérmica y en biocombustibles, invirtiendo en empresas que cotizan en bolsa y tanto en mercados ya desarrollados como emergentes (excepto India) que producen energía a partir de fuentes renovables, incluidas la eólica, solar, hidroeléctrica, geotérmica y biocombustible (incluidas las empresas que cotizan en bolsa que se crean para poseer activos operativos que producen flujos de efectivo</p>

Global X Management Company (Europa) Limited

	<p>definidos y se centran en devolver los flujos de efectivo generados a partir de activos de energía renovable a los accionistas («YieldCos»)) (conjuntamente, «Empresas de energía renovable»), según se definen por Indxx LLC (el «Proveedor del Índice») del Índice Indxx Renewable Energy Producers v2 (el «Índice»).</p> <p>El Fondo tratará de replicar el rendimiento del Índice, con sujeción a la deducción de comisiones y gastos, invirtiendo principalmente en una cartera de valores de renta variable que, en la medida de lo posible y factible, conste de los valores que conforman el Índice en proporciones similares a sus ponderaciones en el propio Índice y en los Certificados de Depósito Estadounidenses (American Depositary Receipts, «ADR») y los Certificados de Depósito Globales (Global Depositary Receipts, «GDR») basados en los valores del Índice.</p> <p>El Índice se pondera de acuerdo con las calificaciones propias ASG del Proveedor del Índice. El Proveedor del Índice, en asociación con el proveedor de datos ASG Minerva, revisa trimestralmente cada componente del Índice para comprobar el cumplimiento de los principios del Pacto Mundial de las Naciones Unidas, así como la participación en la producción de productos controvertidos. Minerva define los productos controvertidos como productos que representan un riesgo sustancial debido a que una gran parte de los inversores los perciben como ofensivos, vergonzosos, perjudiciales, socialmente inaceptables o éticamente censurables. Cualquier componente existente o potencial del Índice que no cumpla con los estándares laborales, de derechos humanos, ambientales y de lucha contra la corrupción definidos por los Principios del Pacto Mundial de las Naciones Unidas, o que incumpla los umbrales establecidos para la participación en productos controvertidos, a partir de la revisión trimestral, se excluirá del Índice, según lo determine el Proveedor del Índice.</p>
Global X Solar UCITS ETF	<p>El Fondo promueve la inversión en empresas posicionadas para beneficiarse de los nuevos avances en el campo de la tecnología solar. Específicamente, el Fondo pretende replicar el Índice Solactive Solar v2 (el «Índice») que consiste en valores emitidos por «Empresas solares» definidos por Solactive AG, el («Proveedor del Índice») como aquellas empresas que obtienen al menos el 50 % de sus ganancias de las siguientes actividades comerciales: Materiales de energía solar: Empresas involucradas en la producción de materias primas que se utilizan principalmente en células solares fotovoltaicas o en espejos o lentes termosolares de concentración (incluidos silicio, telurio de cadmio, deselenuro de galio cobre e indio, dióxido de titanio y/o perovskita). Sistemas y componentes de energía solar: Empresas involucradas en el desarrollo y/o la fabricación de sistemas de energía solar (y sus componentes) que aprovechan la energía del efecto fotovoltaico o de la luz solar para generar electricidad. Por ejemplo, una empresa involucrada en la producción de paneles solares puede clasificarse como que tiene actividades comerciales relacionadas con sistemas y componentes de energía solar. Los paneles solares consisten en una disposición de celdas fotovoltaicas solares montadas en un marco para la instalación. Producción de energía solar: Empresas que generan y distribuyen electricidad a partir de energía ligera. Tecnología solar: Empresas que desarrollan infraestructuras comerciales y residenciales, generadores y motores alimentados con energía solar, así como baterías a escala residencial y comercial para electricidad producida a partir de energía solar y sistemas de carga alimentados con energía solar para vehículos eléctricos u otros dispositivos eléctricos. Instalación, integración y mantenimiento solares: Empresas que prestan servicios de ingeniería y/o asesoramiento para la instalación, integración, el mantenimiento y/o la utilización de energía solar a nivel residencial, comercial e industrial.</p> <p>El Fondo tratará de replicar el rendimiento del Índice, con sujeción a la deducción de comisiones y gastos, invirtiendo principalmente en una cartera de valores de renta variable que, en la medida de lo posible y factible, conste de los valores que conforman el Índice en proporciones similares a sus ponderaciones en el propio Índice y en los Certificados de Depósito Estadounidenses (American Depositary Receipts, «ADR») y los Certificados de Depósito Globales (Global Depositary Receipts, «GDR») basados en los valores del Índice.</p> <p>El Índice se pondera de acuerdo con las calificaciones propias ASG del Proveedor del Índice. El Proveedor del Índice, en asociación con el proveedor de datos ASG Minerva, revisa trimestralmente cada componente del Índice para comprobar el cumplimiento de los principios del Pacto Mundial de las Naciones Unidas, así como la participación en la producción de productos controvertidos. Minerva define los productos controvertidos como productos que representan un riesgo sustancial debido a que una gran parte de los inversores los perciben como ofensivos, vergonzosos, perjudiciales, socialmente inaceptables o éticamente censurables. Cualquier componente existente o potencial del Índice que no cumpla con los estándares laborales, de derechos humanos, ambientales y de lucha contra la corrupción definidos por los Principios del Pacto Mundial de las Naciones Unidas, o que incumpla los umbrales establecidos para la participación en productos controvertidos, a partir de la revisión trimestral, se excluirá del Índice, según lo determine el Proveedor del Índice.</p>

Global X Management Company (Europa) Limited

Global X Wind Energy UCITS ETF	<p>El Fondo promueve la inversión en empresas posicionadas para beneficiarse de los nuevos avances en el campo de la tecnología de energía eólica. El Fondo tratará de replicar el rendimiento del Índice Solactive Wind Energy v2 (el «Índice») que incluirá valores emitidos por «Empresas de energía eólica» según lo definido por Solactive AG, (el «Proveedor del Índice») como aquellas empresas que obtienen al menos el 50 % de sus ganancias, ingresos operativos o activos a partir de las siguientes actividades comerciales: Sistemas de energía eólica: Empresas involucradas en el desarrollo, la fabricación, integración y/o el mantenimiento de componentes de turbinas y de turbinas que aprovechan la energía eólica y la convierten en energía eléctrica. Producción de energía eólica: Empresas que generan y distribuyen electricidad a partir de energía eólica. Tecnología de energía eólica: Empresas que desarrollan infraestructuras y sistemas comerciales y residenciales alimentados con energía eólica, así como baterías a escala residencial y comercial para electricidad producida a partir de energía eólica. Integración y mantenimiento de energía eólica: Empresas que prestan servicios de ingeniería y/o asesoramiento para la instalación, el mantenimiento y/o la utilización de energía eólica a nivel residencial, comercial e industrial. Además, las empresas identificadas por el Proveedor del Índice por tener operaciones comerciales principales en las actividades comerciales descritas anteriormente, pero que actualmente no generan ingresos («Empresas de energía eólica sin ingresos») son aptas para incluirse en el Índice si hay menos de 25 Empresas de energía eólica aptas. Las Empresas de energía eólica sin ingresos están sujetas a un límite de ponderación agregado del 10 % en cada reajuste semestral.</p> <p>El Fondo tratará de replicar el rendimiento del Índice, con sujeción a la deducción de comisiones y gastos, invirtiendo principalmente en una cartera de valores de renta variable que, en la medida de lo posible y factible, conste de los valores que conforman el Índice en proporciones similares a sus ponderaciones en el propio Índice y en los Certificados de Depósito Estadounidenses (American Depositary Receipts, «ADR») y los Certificados de Depósito Globales (Global Depositary Receipts, «GDR») basados en los valores del Índice.</p> <p>El Índice se pondera de acuerdo con las calificaciones propias ASG del Proveedor del Índice. El Proveedor del Índice, en asociación con el proveedor de datos ASG Minerva, revisa trimestralmente cada componente del Índice para comprobar el cumplimiento de los principios del Pacto Mundial de las Naciones Unidas, así como la participación en la producción de productos controvertidos. Minerva define los productos controvertidos como productos que representan un riesgo sustancial debido a que una gran parte de los inversores los perciben como ofensivos, vergonzosos, perjudiciales, socialmente inaceptables o éticamente censurables. Cualquier componente existente o potencial del Índice que no cumpla con los estándares laborales, de derechos humanos, ambientales y de lucha contra la corrupción definidos por los Principios del Pacto Mundial de las Naciones Unidas, o que incumpla los umbrales establecidos para la participación en productos controvertidos, a partir de la revisión trimestral, se excluirá del Índice, según lo determine el Proveedor del Índice.</p>
Global X AgTech & Food Innovation UCITS ETF	<p>El Fondo promueve un mayor impacto medioambiental para los sistemas agrícolas y alimentarios más sostenibles mediante la inversión en AgTech & Food Innovation Companies que están posicionadas para beneficiarse de mayores avances en los campos de la tecnología agrícola («AgTech») y la innovación alimentaria a través de la replicación del Índice. Específicamente, el Índice incluirá valores emitidos por «AgTech & Food Innovation Companies» según lo definido por Solactive AG, el Proveedor del Índice. «AgTech & Food Innovation Companies» son aquellas empresas que obtienen al menos el 50 % de sus ingresos, ingresos operativos o activos de las siguientes actividades comerciales: Agricultura de precisión: La agricultura de precisión utiliza tecnología y datos para optimizar las prácticas agrícolas, minimizando el uso de recursos como agua, fertilizantes y pesticidas a través de una aplicación dirigida. Al reducir los residuos de insumos y el impacto medioambiental, la agricultura de precisión promueve la sostenibilidad en la agricultura, al tiempo que contribuye a la conservación de la biodiversidad y la salud del ecosistema. Las tecnologías se utilizan para aumentar el rendimiento de los cultivos y reducir los niveles de insumos agrícolas tradicionales (tierra, agua, fertilizantes, etc.) para cultivar los cultivos de forma más rentable/eficiente. Las actividades comerciales incluyen el desarrollo de software y hardware de sistemas de información geográfica (Geographic Information System, «GIS») para agricultura basada en GIS, tecnologías de control preciso de malezas, sensores de suelo y agua, seguimiento del tiempo y obtención de imágenes por satélite. Alternativas a proteínas y lácteos: Los productos alternativos de proteínas y lácteos ofrecen opciones sostenibles a los productos tradicionales de origen animal, con menores huellas ambientales en términos de uso de la tierra, consumo de agua y emisiones de gases de efecto invernadero. Al promover proteínas vegetales y alternativas no lácteas, las personas y las industrias pueden mitigar el impacto medioambiental y contribuir a un sistema alimentario más sostenible, abordando las preocupaciones relacionadas con la deforestación, la destrucción del hábitat y el cambio climático. Reducción de residuos alimentarios: Las estrategias de reducción de residuos alimentarios tienen como objetivo minimizar los residuos en varias etapas de la cadena de suministro, desde la producción y la distribución hasta el consumo, conservando así los recursos y reduciendo las emisiones de gases de efecto invernadero. A través de mejores técnicas y tecnologías de cosecha, métodos de almacenamiento, educación del consumidor e iniciativas de redistribución de alimentos excedentes, los esfuerzos de reducción de residuos alimentarios mitigan el impacto medioambiental, alivian la presión sobre los ecosistemas y contribuyen a un sistema alimentario más sostenible y eficiente. Robótica/Automatización: Las tecnologías de robótica y automatización agilizan las tareas agrícolas a través de drones, vehículos autónomos y sistemas impulsados por inteligencia artificial, mejorando la productividad, reduciendo los costes laborales y optimizando el uso de recursos para fomentar prácticas agrícolas sostenibles con un impacto medioambiental potencialmente menor. Agricultura de ambiente controlado: La agricultura ambiental controlada implica cultivar cultivos en interiores o en entornos controlados, optimizar las condiciones para permitir la producción durante todo el año, conservar los recursos y ofrecer oportunidades para la agricultura urbana, promoviendo así la seguridad alimentaria y reduciendo la presión sobre los ecosistemas naturales. Biotecnología agrícola: La biotecnología en la agricultura utiliza la ingeniería genética para mejorar los rasgos de los cultivos, mejorar las producciones y reforzar la resistencia a las plagas y enfermedades, reduciendo potencialmente la dependencia de los insumos químicos al tiempo que aborda las preocupaciones de seguridad alimentaria. El Fondo tratará de replicar la rentabilidad del Índice.</p>

Global X Management Company (Europa) Limited

	<p>El Fondo tratará de replicar el rendimiento del Índice, con sujeción a la deducción de comisiones y gastos, invirtiendo principalmente en una cartera de valores de renta variable que, en la medida de lo posible y factible, conste de los valores que conforman el Índice en proporciones similares a sus ponderaciones en el propio Índice y en los Certificados de Depósito Estadounidenses (American Depositary Receipts, «ADR») y los Certificados de Depósito Globales (Global Depositary Receipts, «GDR») basados en los valores del Índice.</p> <p>El Índice se pondera de acuerdo con las calificaciones propias ASG del Proveedor del Índice. El Proveedor del Índice, en asociación con el proveedor de datos ASG Minerva, revisa trimestralmente cada componente del Índice para comprobar el cumplimiento de los principios del Pacto Mundial de las Naciones Unidas, así como la participación en la producción de productos controvertidos. Minerva define los productos controvertidos como aquellos que plantean un riesgo material debido a que una gran parte de los inversionistas los perciben como ofensivos, vergonzosos, dañinos, socialmente inaceptables, o éticamente objetables. Cualquier componente existente o potencial del Índice que no cumpla con los estándares laborales, de derechos humanos, ambientales y de lucha contra la corrupción definidos por los Principios del Pacto Mundial de las Naciones Unidas, o que incumpla los umbrales establecidos para la participación en productos controvertidos, a partir de la revisión trimestral, se excluirá del Índice, según lo determine el Proveedor del Índice.</p>

Global X Management Company (Europa) Limited

Website section 'Environmental or social characteristics of the financial product'

Full name of the Article 8 (sub-) fund:	Environmental or social characteristics or the sustainable investment objective of that financial product.
Global X Clean Water UCITS ETF	<p>The Fund promotes investment in companies that have business operations in the provision of clean provision of clean water ("Clean Water Companies"), by replicating the Solactive Global Clean Water Industry v2 Index (the "Index").</p> <p>Clean Water Companies as defined by Solactive AG, (the "Index Provider"), are those companies that derive at least 50% of their revenues, operating income, or assets from the following business activities: (1) Industrial water treatment, recycling (including water reclamation), purification, and conservation; (2) water storage, transportation, metering, and distribution infrastructure; (3) production of household and commercial water purifier and heating products; and (4) provision of consulting services identifying and implementing water efficiency strategies at the corporate and/ or municipal levels.</p>
Global X CleanTech UCITS ETF	<p>The Fund promotes investment in exchange-listed companies that are positioned to benefit from the increased adoption of technologies focused on improving the efficiency of renewable energy production and/or mitigating the adverse environmental effects of resource consumption ("CleanTech"), including, but not limited to, companies whose principal business is in developing technology relating to renewable energy, energy efficiency and storage, smart grid, lithium-ion batteries and/or fuel cells, and/or pollution prevention/amelioration (collectively, "CleanTech Companies"), as defined by Indxx LLC (the "Index Provider") the index provider of the Indxx Global CleanTech v2 Index (the "Index"). The Fund seeks to replicate the performance of the Index.</p>
Global X Hydrogen UCITS ETF	<p>The Fund promotes investment in companies that that are positioned to benefit from further advances in the field of hydrogen technology. Hydrogen technology includes products and services focused on the development and implementation of hydrogen gas as a renewable fuel source.</p> <p>Specifically, the Fund will seek to replicate the performance of the Solactive Global Hydrogen v2 Index (the "Index") that will include securities issued by "Hydrogen Companies" as defined by Solactive AG, (the "Index Provider") as those companies that derive at least 50% of their revenues, operating income, or assets from the following business activities: 1. Hydrogen Production: Companies involved in the production, transportation, storage, and distribution of hydrogen (including renewable hydrogen) that can be used as an energy source. 2. Hydrogen Fuel Cells: Companies that develop and/or manufacture fuel cells (and the components thereof) that convert chemical energy into electricity and heat, powered by hydrogen fuel and/or reformed hydrogen-rich gas. 3. Hydrogen Technology: Companies involved in the production of hydrogen electrolyzers (which produce hydrogen gas from water), tanks and pipelines, commercial and residential infrastructure, generators, engines, and vehicles powered by hydrogen fuel cells, as well as hydrogen fuelling stations. 4. Hydrogen Integration: Companies that provide engineering and consulting services for the adoption and utilization of hydrogen-based fuel and/or energy sources at the residential, commercial, and industrial levels.</p> <p>In addition, companies identified by the Index Provider as deriving greater than 0% but less than 50% of revenue from the business activities described above ("Diversified Hydrogen Companies"), as well as companies identified by the Index Provider as having primary business operations in the business activities described above but that do not currently generate revenues ("Pre-Revenue Hydrogen Companies"), are eligible for inclusion in the Index. In addition, Diversified Hydrogen Companies and Pre-Revenue Hydrogen Companies are subject to an individual weight cap of 2% and an aggregate weight cap of 10% at each semi-annual rebalance.</p>
Global X Renewable Energy Producers UCITS ETF	<p>The Fund promotes investment in renewable sources including wind, solar, hydroelectric, geothermal, and biofuels by investing in publicly traded companies listed in either developed or emerging markets (excluding India) that produce energy from renewable sources including wind, solar, hydroelectric, geothermal, and biofuels (including publicly traded companies that are formed to own operating assets that produce defined cash flows and are focused on returning cash flows generated from renewable energy assets to shareholders), as defined by Indxx LLC (the "Index Provider") the index provider of the Indxx Renewable Energy Producers v2 Index (the "Index"). The Fund will seek to replicate the performance of the Index.</p>
Global X Solar UCITS ETF	<p>The Fund promotes investment in companies that are positioned to benefit from further advances in the field of solar technology. Specifically, the Fund seeks to replicate the Solactive Solar v2 Index (the "Index") that consists of securities issued by "Solar Companies" defined by Solactive AG, the ("Index Provider") as those companies that derive at least 50% of their revenues from the following business activities: Solar Energy Materials: Companies involved in the production of raw materials that are primarily used in photovoltaic solar cells or concentrating solar-thermal mirrors or lenses (including silicon, cadmium telluride, copper indium gallium deselenide, titanium dioxide, and/or perovskite). Solar Energy Systems & Components: Companies involved in the development and/or manufacturing of solar energy systems (and the components thereof) that harness energy from the photovoltaic effect or from sunlight to generate electricity. For example, a company involved in the production of solar panels may be categorized as having business activities related to Solar Energy Systems & Components. Solar panels consist of an arrangement of solar photovoltaic cells mounted in a</p>

Global X Management Company (Europa) Limited

	<p>framework for installation. Solar Power Production: Companies that generate and distribute electricity from light energy. Solar Technology: Companies that develop commercial and residential infrastructure, generators, and engines powered by solar energy, as well as residential and commercial scale batteries for electricity produced from solar power, and solar-powered charging systems for electric vehicles or other electric devices. Solar Installation, Integration & Maintenance: Companies that provide engineering and/or advisory services for the installation, integration, maintenance, and/or utilization of solar power at the residential, commercial, and industrial levels.</p>
Global X Wind Energy UCITS ETF	<p>The Fund promotes investment in companies that are positioned to benefit from further advances in the field of wind energy technology. The Fund will seek to replicate the performance of the Solactive Wind Energy v2 Index (the “Index”) to include securities issued by “Wind Energy Companies” as defined by Solactive AG, (the “Index Provider”) as those companies that derive at least 50% of their revenues, operating income, or assets from the following business activities: Wind Energy Systems: Companies involved in development, manufacturing, integration, and/or maintenance of turbine components and turbines that harness energy from the wind and convert it into electrical power. Wind Power Production: Companies that generate and distribute electricity from wind power.</p> <p>Wind Energy Technology: Companies that develop commercial and residential infrastructure and systems powered by wind energy, as well as residential and commercial scale batteries for electricity produced from wind power. Wind Power Integration & Maintenance: Companies that provide engineering and/or advisory services for the installation, maintenance, and/or utilization of wind energy at the residential, commercial, and industrial levels. In addition, companies identified by the Index Provider as having primary business operations in the business activities described above but that do not currently generate revenues (“Pre-Revenue Wind Energy Companies”), are eligible for inclusion in the Index if there are fewer than 25 eligible Wind Energy Companies. Pre-Revenue Wind Energy Companies are subject to an aggregate weight cap of 10% at each semi-annual rebalance.</p>
Global X AgTech & Food Innovation UCITS ETF	<p>The Fund promotes improved environmental impact for farming and more sustainable food systems by investment in AgTech & Food Innovation Companies that are positioned to benefit from further advances in the fields of agricultural technology (“AgTech”) and food innovation through replicating the Index. Specifically, the Index will include securities issued by “AgTech & Food Innovation Companies” as defined by Solactive AG, the Index Provider. “AgTech & Food Innovation Companies” are those companies that derive at least 50% of their revenues, operating income, or assets from the following business activities: Precision Agriculture: Precision agriculture utilises technology and data to optimise farming practices, minimising resource usage such as water, fertilizer, and pesticides through targeted application. By reducing input waste and environmental impact, precision agriculture promotes sustainability in farming while also contributing to biodiversity conservation and ecosystem health. Technologies are used to increase crop yields and reduce levels of traditional agricultural inputs (land, water, fertilizer, etc.) to grow crops more profitably/efficiently. Business activities include the development of Geographic Information System (“GIS”) software and hardware for GIS-based agriculture, precision weed control technologies, soil and water sensors, weather tracking, and satellite imaging. Protein & Dairy Alternatives: Protein and dairy alternative products offer sustainable options to traditional animal-based products, with lower environmental footprints in terms of land use, water consumption, and greenhouse gas emissions. By promoting plant-based proteins and non-dairy alternatives, individuals and industries can mitigate environmental impact and contribute to a more sustainable food system, addressing concerns related to deforestation, habitat destruction, and climate change. Food Waste Reduction: Food waste reduction strategies aim to minimise waste at various stages of the supply chain, from production and distribution to consumption, thereby conserving resources and reducing greenhouse gas emissions. Through improved harvesting techniques and technologies, storage methods, consumer education, and surplus food redistribution initiatives, food waste reduction efforts mitigate environmental impact, alleviate pressure on ecosystems, and contribute to a more sustainable and efficient food system. Robotics/Automation: Robotics and automation technologies streamline agricultural tasks through drones, autonomous vehicles, and artificial intelligence-driven systems, enhancing productivity, reducing labour costs, and optimising resource usage to foster sustainable farming practices with potentially lower environmental impacts. Controlled Environment Agriculture: Controlled environment agriculture involves growing crops indoors or in controlled settings, optimising conditions to enable year-round production, conserving resources, and offering opportunities for urban farming, thus promoting food security and reducing pressure on natural ecosystems. Agricultural Biotechnology: Biotechnology in agriculture utilises genetic engineering to improve crop traits, enhance yields, and bolster resistance to pests and diseases, potentially reducing the reliance on chemical inputs while addressing food security concerns. The Fund will seek to replicate the performance of the Index.</p>

Website section 'Investment strategy'

Full name of the Article 8 (sub-) fund:	The investment strategy used to meet the environmental or social characteristics promoted by the financial product;	The policy to assess good governance practices of the investee companies, including with respect to sound management structures, employee relations, remuneration of staff and tax compliance.
Global X Clean Water UCITS ETF	The Fund will seek to replicate the performance of the Index subject to the deduction of fees and expenses by investing primarily in a portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index and in American Depositary Receipts and Global Depositary Receipts based on the securities in the Index.	<p>The good governance practices for each of the entities in which the Fund invests are assessed by applying the following:</p> <p>United Nations Global Compact Principles</p> <p>Each of the eligible companies for investment by the Fund are screened on a quarterly basis to assess whether each constituent complies with the principles of the United Nations Global Compact in order that the Fund will aim to invest only in companies that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption.</p> <p>Controversial Products</p> <p>Each constituent is also reviewed on a quarterly basis for involvement in the production of controversial products. Controversial products are defined as products that pose a material risk due to a large portion of investors perceiving them as offensive, embarrassing, harmful, socially unacceptable, or ethically objectionable.</p> <p>Exclusions</p> <p>Any existing or potential constituent of the Index which does not meet the labour, human rights, environmental, and anti-corruption standards as defined by the United Nations Global Compact Principles, or that breaches the established thresholds for involvement in controversial products, as of the quarterly review will be excluded from the Index and therefore not included in the Fund's investment universe.</p> <p>The Investment Manager has adopted proxy voting policies and guidelines and has engaged a third party proxy solicitation firm, Glass Lewis & Co. ("Glass Lewis"), whose guidelines encourage the maximization of return for shareholders through identifying and avoiding financial, audit and corporate governance risks. Except in instances where the Investment Manager has provided Glass Lewis with different direction, Glass Lewis has agreed to vote proxies in accordance with recommendations developed by Glass Lewis and overseen by the Investment Manager.</p>

Website section 'Limitations to methodologies and data'

Full name of the Article 8 (sub-) fund:	
Global X Clean Water UCITS ETF	<p>The data landscape for ESG analysis and reporting is rapidly developing and data quality and methodology currently face industry-wide challenges. Limitations on methodologies and ESG data include the lack of consistency, reliability, comparability, and quality of the data available. This is driven by issues including, but not limited to:</p> <ul style="list-style-type: none"> • Lack of common methodology across providers of ESG ratings; • Lack of standardised reporting by companies; • Different models and analytical tools for unreported data; and • Backward looking information that fails to capture "direction of travel". <p>The Investment Manager does not verify a company as a Clean Water Company (as defined above) and is reliant on the Index Provider's and ESG data provider Minerva's expertise to select the companies according to the criteria as set out in the methodology of the Index and based on the sustainability indicators and exclusion screens. The Index Provider and Minerva are subject to initial and ongoing due diligence checks by the Investment Manager to verify their skill and expertise.</p> <p>The Investment Manager does not generally have the ability to independently verify data from external data providers and is therefore dependent on the integrity of external providers and the processes by which any such data is generated. In placing reliance on external data providers there are certain risks that may arise, including but not limited to errors in third party data used by the Investment Manager.</p>

Global X Management Company (Europa) Limited

	<p>Such errors may be undetectable and can result in holdings weightings that are inconsistent with the stated methodology of the index and/or the investment objective and/or policy of the Fund. The Funds could incur unexpected costs as a result such errors.</p> <p>These limitations are addressed by:</p> <ul style="list-style-type: none"> • Use of varied data sources; and • Reliance on internal research and analysis using third party data as complementary information. <p>These limitations do not impact on the Fund's ability to attain the environmental and/or social characteristics that it promotes.</p>

Global X Wind Energy UCITS ETF	<p>The Investment Manager carries out due diligence on any third party data provider, such as the Index Provider and Minerva, evaluates the Index methodology to determine whether it will achieve the desired investment outcome and environmental or social characteristics promoted by the Fund, carries out spot checks of data each quarter, and escalates data concerns to the data provider as needed.</p> <p>Where data is provided from a third party provider, the Investment Manager evaluates the methodology at the outset and then carries out spot checks of the data each quarterly. Data metrics required for reporting are currently calculated in house in line with recognised guidance and regulations.</p> <p>The Investment Manager carries out an analysis of the investment universe of potential securities (and in particular the degree of coverage by third-party ESG data providers) and the exclusionary criteria applied (e.g., compliance with the principles of the United Nations Global Compact, as well as for involvement in the production of controversial products). Any existing or potential constituent of the Index which does not meet the labor, human rights, environmental, and anti-corruption standards as defined by the United Nations Global Compact Principles, or that breaches the established thresholds for involvement in controversial products, as of the quarterly review will be excluded from the Index, as determined by the Index Provider.</p>
