|---|--|
| Global X Clean Water UCITS ETF | <p>Il Comparto promuove investimenti in società operanti nel settore della fornitura di acqua potabile ("Società nel settore dell'acqua potabile"), replicando il Solactive Global Clean Water Industry v2 Index (l'"Indice").</p> <p>Il Comparto cercherà di replicare la performance dell'Indice, fatta salva la deduzione di commissioni e spese, investendo principalmente in un portafoglio di titoli azionari che, per quanto possibile e praticabile, sia costituito dai titoli componenti l'Indice in proporzioni simili alle loro ponderazioni nell'Indice e nei certificati di deposito statunitensi ("ADR") e nei certificati di deposito globali ("GDR") basati sui titoli dell'Indice.</p> <p>Le Società nel settore dell'acqua potabile, secondo la definizione di Solactive AG, il fornitore dell'Indice (il "Fornitore dell'Indice"), sono quelle che traggono almeno il 50% dei propri ricavi, del proprio reddito operativo o dei propri attivi dalle seguenti attività commerciali: (1) trattamento, riuso (compreso il recupero dell'acqua), depurazione e conservazione dell'acqua a livello industriale; (2) infrastrutture per la conservazione, il trasporto, la misurazione e la distribuzione dell'acqua; (3) produzione di prodotti per la depurazione e il riscaldamento dell'acqua a livello domestico e commerciale; e (4) svolgimento di un'attività economica che contribuisce a un obiettivo ambientale o sociale, a condizione che l'investimento non interferisca in modo significativo con alcun obiettivo ambientale o sociale e che le società partecipate seguano pratiche di buona governance.</p> <p>L'Indice è ponderato in base ai rating ESG proprietari del Fornitore dell'Indice. Il Fornitore dell'Indice, in collaborazione con il fornitore di dati ESG Minerva, esamina trimestralmente ogni componente dell'Indice per verificare la conformità ai Princìpi del Patto mondiale delle Nazioni Unite e il coinvolgimento nella produzione di prodotti controversi. I prodotti controversi sono definiti da Minerva come prodotti che rappresentano un rischio sostanziale poiché gran parte degli investitori li percepisce come offensivi, imbarazzanti, dannosi, socialmente inaccettabili o eticamente discutibili. Qualsiasi componente esistente o potenziale dell'Indice che, al momento della revisione trimestrale, non soddisfi gli standard in materia di lavoro, diritti umani, ambiente e lotta alla corruzione definiti dai Princìpi del Patto mondiale delle Nazioni Unite, o che non rispetti le soglie fissate per il coinvolgimento in prodotti controversi, sarà escluso dall'Indice, come stabilito dal Fornitore dell'Indice.</p> |
| Global X CleanTech UCITS ETF | <p>Il Comparto promuove gli investimenti in società quotate in borsa che sono posizionate per beneficiare di una maggiore adozione di tecnologie incentrate sul miglioramento dell'efficienza della produzione di energia rinnovabile e/o sulla mitigazione degli effetti ambientali negativi del consumo di risorse ("CleanTech"), tra cui, a titolo esemplificativo e non esaustivo, società la cui attività principale consiste nello sviluppo di tecnologie relative all'energia rinnovabile, all'efficienza e all'immagazzinamento dell'energia, alle smart grid, alle batterie agli ioni di litio e/o alle celle a combustibile, e/o alla prevenzione/miglioramento dell'inquinamento (collettivamente, "Società CleanTech"), secondo la definizione di Indxx LLC, (il "Fornitore dell'Indice") dell'Indxx Global CleanTech v2 Index (l'"Indice").</p> |

| | <p>Il Comparto cercherà di replicare la performance dell'Indice, fatta salva la deduzione di commissioni e spese, investendo principalmente in un portafoglio di titoli azionari che, per quanto possibile e praticabile, sia costituito dai titoli componenti l'Indice in proporzioni simili alle loro ponderazioni nell'Indice e nei certificati di deposito statunitensi ("ADR") e nei certificati di deposito globali ("GDR") basati sui titoli dell'Indice.</p> <p>L'Indice è ponderato in base ai rating ESG proprietari del Fornitore dell'Indice. Il Fornitore dell'Indice, in collaborazione con il fornitore di dati ESG Minerva, esamina trimestralmente ogni componente dell'Indice per verificare la conformità ai Principi del Patto mondiale delle Nazioni Unite e il coinvolgimento nella produzione di prodotti controversi. I prodotti controversi sono definiti da Minerva come prodotti che rappresentano un rischio sostanziale poiché gran parte degli investitori li percepisce come offensivi, imbarazzanti, dannosi, socialmente inaccettabili o eticamente discutibili. Qualsiasi componente esistente o potenziale dell'Indice che, al momento della revisione trimestrale, non soddisfi gli standard in materia di lavoro, diritti umani, ambiente e lotta alla corruzione definiti dai Principi del Patto mondiale delle Nazioni Unite, o che non rispetti le soglie fissate per il coinvolgimento in prodotti controversi, sarà escluso dall'Indice, come stabilito dal Fornitore dell'Indice.</p> |
| <p>Global X Hydrogen UCITS ETF</p> | <p>Il Comparto promuove l'investimento in società che sono posizionate per beneficiare di ulteriori progressi nel campo della tecnologia dell'idrogeno.</p> <p>La tecnologia dell'idrogeno include prodotti e servizi focalizzati sullo sviluppo e l'implementazione del gas idrogeno come fonte di combustibile rinnovabile.</p> <p>Nello specifico, il Comparto cercherà di replicare la performance del Solactive Global Hydrogen v2 Index (l'"Indice") che includerà titoli emessi da "Società operanti nel settore dell'idrogeno", definite da Solactive AG (il "Fornitore dell'Indice") come società che traggono almeno il 50% dei propri ricavi, del proprio reddito operativo o dei propri attivi dalle seguenti attività commerciali: 1. Produzione di idrogeno: Società coinvolte nella produzione, nel trasporto, nello stoccaggio e nella distribuzione di idrogeno (compreso l'idrogeno rinnovabile) che può essere utilizzato come fonte di energia. 2. Celle a combustibile a idrogeno: Società che sviluppano e/o producono celle a combustibile (e i relativi componenti) che convertono l'energia chimica in elettricità e calore, alimentate da combustibile idrogeno e/o gas ricco di idrogeno riformato. 3. Tecnologia a idrogeno: Società coinvolte nella produzione di elettrolizzatori di idrogeno (che producono gas idrogeno dall'acqua), serbatoi e condutture, infrastrutture commerciali e residenziali, generatori, motori e veicoli alimentati da celle a combustibile a idrogeno, nonché stazioni di rifornimento di idrogeno. 4. Integrazione dell'idrogeno: Società che forniscono servizi di ingegneria e consulenza per l'adozione e l'utilizzo di combustibili e/o fonti energetiche a base di idrogeno a livello residenziale, commerciale e industriale.</p> <p>Inoltre, possono essere incluse nell'Indice le società che il Fornitore dell'Indice identifica come società che ricavano più dello 0% ma meno del 50% dei propri ricavi dalle attività commerciali sopra descritte ("Società diversificate nel settore dell'idrogeno"), nonché le società che il Fornitore dell'Indice identifica come avenuti operazioni aziendali principali nelle attività commerciali sopra descritte, ma che attualmente non hanno ancora generato ricavi ("Società pre-revenue nel settore dell'idrogeno"). Inoltre, le Società diversificate nel settore dell'idrogeno e le Società pre-revenue nel settore dell'idrogeno sono soggette a un tetto massimo di peso individuale del 2% e a un tetto massimo di peso aggregato del 10% a ogni ribilanciamento semestrale.</p> <p>Il Comparto cercherà di replicare la performance dell'Indice, fatta salva la deduzione di commissioni e spese, investendo principalmente in un portafoglio di titoli azionari che, per quanto possibile e praticabile, sia costituito dai titoli componenti l'Indice in proporzioni simili alle loro ponderazioni nell'Indice e nei certificati di deposito statunitensi ("ADR") e nei certificati di deposito globali ("GDR") basati sui titoli dell'Indice.</p> <p>L'Indice è ponderato in base ai rating ESG proprietari del Fornitore dell'Indice. Il Fornitore dell'Indice, in collaborazione con il fornitore di dati ESG Minerva, esamina trimestralmente ogni componente dell'Indice per verificare la conformità ai Principi del Patto mondiale delle Nazioni Unite e il coinvolgimento nella produzione di prodotti controversi. I prodotti controversi sono definiti da Minerva come prodotti che rappresentano un rischio sostanziale poiché gran parte degli investitori li percepisce come offensivi, imbarazzanti, dannosi, socialmente inaccettabili o eticamente discutibili. Qualsiasi componente esistente o potenziale dell'Indice che, al momento della revisione trimestrale, non soddisfi gli standard in materia di lavoro, diritti umani, ambiente e lotta alla corruzione definiti dai Principi del Patto mondiale delle Nazioni Unite, o che non rispetti le soglie fissate per il coinvolgimento in prodotti controversi, sarà escluso dall'Indice, come stabilito dal Fornitore dell'Indice.</p> |
| <p>Global X Renewable Energy Producers UCITS ETF</p> | <p>Il Comparto promuove l'investimento in fonti rinnovabili, ovvero in società quotate in mercati sviluppati o emergenti (esclusa l'India) che producono energia da fonti rinnovabili, tra cui l'eolico, il solare, l'idroelettrico, il geotermico e i biocarburanti (compresa le società quotate in borsa costituite per possedere attività operative che producono flussi di cassa definiti e che sono focalizzate sulla restituzione agli azionisti dei flussi di cassa generati da attività energetiche rinnovabili ("YieldCos")) collettivamente, "Società nel settore dell'energia rinnovabile"), come definite da Indxx LLC (il "Fornitore dell'Indice") dell'Indxx Renewable Energy Producers v2 Index (l"Indice").</p> |

Global X Management Company (Europe) Limited

|---------------------------------------|---|
| | <p>Il Comparto cercherà di replicare la performance dell'Indice, fatta salva la deduzione di commissioni e spese, investendo principalmente in un portafoglio di titoli azionari che, per quanto possibile e praticabile, sia costituito dai titoli componenti l'Indice in proporzioni simili alle loro ponderazioni nell'Indice e nei certificati di deposito statunitensi ("ADR") e nei certificati di deposito globali ("GDR") basati sui titoli dell'Indice.</p> <p>L'Indice è ponderato in base ai rating ESG proprietari del Fornitore dell'Indice. Il Fornitore dell'Indice, in collaborazione con il fornitore di dati ESG Minerva, esamina trimestralmente ogni componente dell'Indice per verificare la conformità ai Princìpi del Patto mondiale delle Nazioni Unite e il coinvolgimento nella produzione di prodotti controversi. I prodotti controversi sono definiti da Minerva come prodotti che rappresentano un rischio sostanziale poiché gran parte degli investitori li percepisce come offensivi, imbarazzanti, dannosi, socialmente inaccettabili o eticamente discutibili. Qualsiasi componente esistente o potenziale dell'Indice che, al momento della revisione trimestrale, non soddisfi gli standard in materia di lavoro, diritti umani, ambiente e lotta alla corruzione definiti dai Princìpi del Patto mondiale delle Nazioni Unite, o che non rispetti le soglie fissate per il coinvolgimento in prodotti controversi, sarà escluso dall'Indice, come stabilito dal Fornitore dell'Indice.</p> |
| <p>Global X Solar UCITS ETF</p> | <p>Il Comparto promuove l'investimento in società che sono posizionate per beneficiare di ulteriori progressi nel campo della tecnologia solare. Nello specifico, il Comparto cerca di replicare il Solactive Solar v2 Index ("Indice") che è costituito da titoli emessi da "Società nel settore dell'energia solare", definite da Solactive AG (il "Fornitore dell'Indice") come società che traggono almeno il 50% dei propri ricavi dalle seguenti attività commerciali: Materie prime per l'energia solare: Società coinvolte nella produzione di materie prime utilizzate principalmente nelle celle solari fotovoltaiche o negli specchi o lenti a concentrazione per il solare termico (tra cui silicio, tellurio di cadmio, diseleniuro di rame indio gallio, biossido di titanio e/o perovskite). Sistemi e componenti per l'energia solare: Società coinvolte nello sviluppo e/o nella produzione di sistemi a energia solare (e dei relativi componenti) che sfruttano l'energia dell'effetto fotovoltaico o della luce solare per generare elettricità. Ad esempio, una società che si occupa della produzione di pannelli solari può essere classificata come avente attività commerciali legate a Sistemi e componenti per l'energia solare. I pannelli solari sono costituiti da un insieme di celle solari fotovoltaiche montate in una struttura per l'installazione. Produzione di energia solare: Società che generano e distribuiscono energia elettrica da fonte luminosa. Tecnologia solare: Società che sviluppano infrastrutture commerciali e residenziali, generatori e motori alimentati dall'energia solare, nonché batterie su scala residenziale e commerciale per l'elettricità prodotta dall'energia solare e sistemi di ricarica a energia solare per veicoli elettrici o altri dispositivi elettrici. Installazione, integrazione e manutenzione del solare: Società che forniscono servizi di ingegneria e/o consulenza per l'installazione, l'integrazione, la manutenzione e/o l'utilizzo dell'energia solare a livello residenziale, commerciale e industriale.</p> <p>Il Comparto cercherà di replicare la performance dell'Indice, fatta salva la deduzione di commissioni e spese, investendo principalmente in un portafoglio di titoli azionari che, per quanto possibile e praticabile, sia costituito dai titoli componenti l'Indice in proporzioni simili alle loro ponderazioni nell'Indice e nei certificati di deposito statunitensi ("ADR") e nei certificati di deposito globali ("GDR") basati sui titoli dell'Indice.</p> <p>L'Indice è ponderato in base ai rating ESG proprietari del Fornitore dell'Indice. Il Fornitore dell'Indice, in collaborazione con il fornitore di dati ESG Minerva, esamina trimestralmente ogni componente dell'Indice per verificare la conformità ai Princìpi del Patto mondiale delle Nazioni Unite e il coinvolgimento nella produzione di prodotti controversi. I prodotti controversi sono definiti da Minerva come prodotti che rappresentano un rischio sostanziale poiché gran parte degli investitori li percepisce come offensivi, imbarazzanti, dannosi, socialmente inaccettabili o eticamente discutibili. Qualsiasi componente esistente o potenziale dell'Indice che, al momento della revisione trimestrale, non soddisfi gli standard in materia di lavoro, diritti umani, ambiente e lotta alla corruzione definiti dai Princìpi del Patto mondiale delle Nazioni Unite, o che non rispetti le soglie fissate per il coinvolgimento in prodotti controversi, sarà escluso dall'Indice, come stabilito dal Fornitore dell'Indice.</p> |
| <p>Global X Wind Energy UCITS ETF</p> | <p>Il Comparto promuove l'investimento in società che sono posizionate per beneficiare di ulteriori progressi nel campo della tecnologia dell'energia eolica. Il Comparto cercherà di replicare la performance del Solactive Wind Energy v2 Index ("Indice") includendo titoli emessi da "Società nel settore dell'energia eolica", definite da Solactive AG (il "Fornitore dell'Indice") come società che traggono almeno il 50% dei propri ricavi, del proprio reddito operativo o dei propri attivi dalle seguenti attività commerciali: Sistemi di energia eolica: Società coinvolte nello sviluppo, nella produzione, nell'integrazione e/o nella manutenzione di componenti di turbine e turbine che sfruttano l'energia eolica e la convertono in energia elettrica. Produzione di energia eolica: Società che generano e distribuiscono elettricità dall'energia eolica. Tecnologia dell'energia eolica: Società che sviluppano infrastrutture e sistemi commerciali e residenziali alimentati dall'energia eolica, nonché batterie su scala residenziale e commerciale per l'elettricità prodotta dall'energia eolica. Integrazione e manutenzione dell'energia eolica: Società che forniscono servizi di ingegneria e/o consulenza per l'installazione, la manutenzione e/o l'utilizzo dell'energia eolica a livello residenziale, commerciale e industriale. Inoltre, le società che il Fornitore dell'Indice identifica come aventi operazioni aziendali principali nelle attività sopra descritte, ma che attualmente non generano ricavi ("Società pre-revenue nel settore dell'energia eolica"), sono idonee all'inclusione nell'Indice se ci sono meno di 25 Società nel settore dell'energia eolica idonee. Le Società pre-revenue nel settore dell'energia eolica sono soggette a un tetto massimo di peso aggregato del 10% a ogni ribilanciamento semestrale.</p> <p>Il Comparto cercherà di replicare la performance dell'Indice, fatta salva la deduzione di commissioni e spese, investendo principalmente in un portafoglio di titoli azionari che, per quanto possibile e praticabile, sia costituito dai titoli componenti l'Indice in proporzioni simili alle loro ponderazioni nell'Indice e nei certificati di deposito statunitensi ("ADR") e nei certificati di deposito globali ("GDR") basati sui titoli dell'Indice.</p> |

Global X Management Company (Europe) Limited

|--|---|
| | <p>L'Indice è ponderato in base ai rating ESG proprietari del Fornitore dell'Indice. Il Fornitore dell'Indice, in collaborazione con il fornitore di dati ESG Minerva, esamina trimestralmente ogni componente dell'Indice per verificare la conformità ai Principi del Patto mondiale delle Nazioni Unite e il coinvolgimento nella produzione di prodotti controversi. I prodotti controversi sono definiti da Minerva come prodotti che rappresentano un rischio sostanziale poiché gran parte degli investitori li percepisce come offensivi, imbarazzanti, dannosi, socialmente inaccettabili o eticamente discutibili. Qualsiasi componente esistente o potenziale dell'Indice che, al momento della revisione trimestrale, non soddisfi gli standard in materia di lavoro, diritti umani, ambiente e lotta alla corruzione definiti dai Principi del Patto mondiale delle Nazioni Unite, o che non rispetti le soglie fissate per il coinvolgimento in prodotti controversi, sarà escluso dall'Indice, come stabilito dal Fornitore dell'Indice.</p> |
| <p>Global X AgTech & Food Innovation UCITS ETF</p> | <p>Il Fondo promuove un migliore impatto ambientale per l'agricoltura e sistemi alimentari più sostenibili tramite investimenti in Società di AgTech & Food Innovation posizionate per beneficiare di ulteriori progressi nei settori della tecnologia agricola ("AgTech") e dell'innovazione alimentare replicando l'Indice. Nello specifico, l'Indice includerà titoli emessi da "Società del settore AgTech & Food Innovation" come definito da Solactive AG, il Fornitore dell'Indice. Le "Società del settore AgTech & Food Innovation" sono aziende che ottengono almeno il 50% dei loro ricavi, reddito operativo o attività dalle seguenti attività aziendali: Agricoltura di precisione: l'agricoltura di precisione utilizza tecnologie e dati per ottimizzare le pratiche agricole, riducendo al minimo l'utilizzo di risorse come acqua, fertilizzanti e pesticidi attraverso un'applicazione mirata. Riducendo gli sprechi e l'impatto ambientale, l'agricoltura di precisione promuove la sostenibilità nell'agricoltura e contribuisce anche alla conservazione della biodiversità e alla salute degli ecosistemi. Le tecnologie vengono utilizzate per aumentare i raccolti e ridurre l'uso dei tradizionali fattori produttivi agricoli (terra, acqua, fertilizzanti, ecc.) permettendo di coltivare in modo più redditizio/efficiente. Le attività commerciali includono lo sviluppo di software e hardware per il sistema di informazione geografica ("GIS") per l'agricoltura basata su GIS, tecnologie di controllo mirato delle erbe infestanti, sensori per suolo e acqua, monitoraggio meteorologico e imaging satellitare. Alternative relative a proteine e latticini: i prodotti alternativi relativi a proteine e latticini offrono opzioni sostenibili rispetto ai tradizionali prodotti di origine animale, con un impatto ambientale inferiore in termini di uso del suolo, consumo di acqua ed emissioni di gas serra. Promuovendo proteine vegetali e alternative non casearie, le persone e le industrie possono mitigare l'impatto ambientale e contribuire a un sistema alimentare più sostenibile, affrontando le preoccupazioni relative alla deforestazione, alla distruzione dell'habitat e ai cambiamenti climatici. Riduzione dello spreco alimentare: le strategie di riduzione dello spreco alimentare mirano a ridurre al minimo lo spreco nelle varie fasi della catena di approvvigionamento, dalla produzione e distribuzione al consumo, preservando così le risorse e riducendo le emissioni di gas serra. Attraverso tecniche e tecnologie di raccolta migliorate, metodi di stoccaggio, educazione dei consumatori e iniziative di ridistribuzione degli alimenti in eccedenza, si riduce l'impatto ambientale, si allevia la pressione sugli ecosistemi e si contribuisce a un sistema alimentare più sostenibile ed efficiente. Robotica/automazione: la robotica e le tecnologie di automazione semplificano le attività agricole attraverso l'impiego di droni, veicoli autonomi e sistemi basati sull'intelligenza artificiale, migliorando la produttività, riducendo i costi del lavoro e ottimizzando l'utilizzo delle risorse, favorendo pratiche agricole sostenibili con impatti ambientali potenzialmente inferiori. Agricoltura in ambienti controllati: l'agricoltura in ambienti controllati prevede la coltivazione indoor o in ambienti controllati, ottimizzando le condizioni per consentire la produzione durante tutto l'anno, conservando le risorse e favorendo l'agricoltura urbana, promuovendo così la sicurezza alimentare e riducendo la pressione sugli ecosistemi naturali. Biotecnologia agricola: la biotecnologia agricola utilizza l'ingegneria genetica per migliorare le caratteristiche delle colture, aumentare i raccolti e rafforzare la resistenza a parassiti e malattie, riducendo potenzialmente la dipendenza da prodotti chimici e contribuendo alla sicurezza alimentare. Il Comparto cercherà di replicare la performance dell'Indice.</p> <p>Il Comparto cercherà di replicare la performance dell'Indice, fatta salva la deduzione di commissioni e spese, investendo principalmente in un portafoglio di titoli azionari che, per quanto possibile e praticabile, sia costituito dai titoli componenti l'Indice in proporzioni simili alle loro ponderazioni nell'Indice e nei certificati di deposito statunitensi ("ADR") e nei certificati di deposito globali ("GDR") basati sui titoli dell'Indice.</p> <p>L'Indice è ponderato in base ai rating ESG proprietari del Fornitore dell'Indice. Il Fornitore dell'Indice, in collaborazione con il fornitore di dati ESG Minerva, esamina trimestralmente ogni componente dell'Indice per verificare la conformità ai Principi del Patto mondiale delle Nazioni Unite e il coinvolgimento nella produzione di prodotti controversi. I prodotti controversi sono definiti da Minerva come prodotti che comportano un rischio materiale a causa del fatto che gran parte degli investitori li percepisce come offensivi, imbarazzanti, dannosi, socialmente inaccettabili o eticamente discutibili. Qualsiasi componente esistente o potenziale dell'Indice che, al momento della revisione trimestrale, non soddisfi gli standard in materia di lavoro, diritti umani, ambiente e lotta alla corruzione definiti dai Principi del Patto mondiale delle Nazioni Unite, o che non rispetti le soglie fissate per il coinvolgimento in prodotti controversi, sarà escluso dall'Indice, come stabilito dal Fornitore dell'Indice.</p> |

Global X Management Company (Europe) Limited

Website section 'Environmental or social characteristics of the financial product'

| Full name of the Article 8 (sub-) fund: | Environmental or social characteristics or the sustainable investment objective of that financial product. |
|---|---|
| Global X Clean Water UCITS ETF | <p>The Fund promotes investment in companies that have business operations in the provision of clean provision of clean water ("Clean Water Companies"), by replicating the Solactive Global Clean Water Industry v2 Index (the "Index").</p> <p>Clean Water Companies as defined by Solactive AG, (the "Index Provider"), are those companies that derive at least 50% of their revenues, operating income, or assets from the following business activities: (1) Industrial water treatment, recycling (including water reclamation), purification, and conservation; (2) water storage, transportation, metering, and distribution infrastructure; (3) production of household and commercial water purifier and heating products; and (4) provision of consulting services identifying and implementing water efficiency strategies at the corporate and/ or municipal levels.</p> |
| Global X CleanTech UCITS ETF | <p>The Fund promotes investment in exchange-listed companies that are positioned to benefit from the increased adoption of technologies focused on improving the efficiency of renewable energy production and/or mitigating the adverse environmental effects of resource consumption ("CleanTech"), including, but not limited to, companies whose principal business is in developing technology relating to renewable energy, energy efficiency and storage, smart grid, lithium-ion batteries and/or fuel cells, and/or pollution prevention/amelioration (collectively, "CleanTech Companies"), as defined by Indxx LLC (the "Index Provider") the index provider of the Indxx Global CleanTech v2 Index (the "Index"). The Fund seeks to replicate the performance of the Index.</p> |
| Global X Hydrogen UCITS ETF | <p>The Fund promotes investment in companies that are positioned to benefit from further advances in the field of hydrogen technology. Hydrogen technology includes products and services focused on the development and implementation of hydrogen gas as a renewable fuel source.</p> <p>Specifically, the Fund will seek to replicate the performance of the Solactive Global Hydrogen v2 Index (the "Index") that will include securities issued by "Hydrogen Companies" as defined by Solactive AG, (the "Index Provider") as those companies that derive at least 50% of their revenues, operating income, or assets from the following business activities: 1. Hydrogen Production: Companies involved in the production, transportation, storage, and distribution of hydrogen (including renewable hydrogen) that can be used as an energy source. 2. Hydrogen Fuel Cells: Companies that develop and/or manufacture fuel cells (and the components thereof) that convert chemical energy into electricity and heat, powered by hydrogen fuel and/or reformed hydrogen-rich gas. 3. Hydrogen Technology: Companies involved in the production of hydrogen electrolyzers (which produce hydrogen gas from water), tanks and pipelines, commercial and residential infrastructure, generators, engines, and vehicles powered by hydrogen fuel cells, as well as hydrogen fuelling stations. 4. Hydrogen Integration: Companies that provide engineering and consulting services for the adoption and utilization of hydrogen-based fuel and/or energy sources at the residential, commercial, and industrial levels.</p> <p>In addition, companies identified by the Index Provider as deriving greater than 0% but less than 50% of revenue from the business activities described above ("Diversified Hydrogen Companies"), as well as companies identified by the Index Provider as having primary business operations in the business activities described above but that do not currently generate revenues ("Pre-Revenue Hydrogen Companies"), are eligible for inclusion in the Index. In addition, Diversified Hydrogen Companies and Pre-Revenue Hydrogen Companies are subject to an individual weight cap of 2% and an aggregate weight cap of 10% at each semi-annual rebalance.</p> |
| Global X Renewable Energy Producers UCITS ETF | <p>The Fund promotes investment in renewable sources including wind, solar, hydroelectric, geothermal, and biofuels by investing in publicly traded companies listed in either developed or emerging markets (excluding India) that produce energy from renewable sources including wind, solar, hydroelectric, geothermal, and biofuels (including publicly traded companies that are formed to own operating assets that produce defined cash flows and are focused on returning cash flows generated from renewable energy assets to shareholders), as defined by Indxx LLC (the "Index Provider") the index provider of the Indxx Renewable Energy Producers v2 Index (the "Index"). The Fund will seek to replicate the performance of the Index.</p> |
| Global X Solar UCITS ETF | <p>The Fund promotes investment in companies that are positioned to benefit from further advances in the field of solar technology. Specifically, the Fund seeks to replicate the Solactive Solar v2 Index (the "Index") that consists of securities issued by "Solar Companies" defined by Solactive AG, the ("Index Provider") as those companies that derive at least 50% of their revenues from the following business activities: Solar Energy Materials: Companies involved in the production of raw materials that are primarily used in photovoltaic solar cells or concentrating solar-thermal mirrors or lenses (including silicon, cadmium telluride, copper indium gallium deselenide, titanium dioxide, and/or perovskite). Solar Energy Systems & Components: Companies involved in the development and/or manufacturing of solar energy systems (and the components thereof) that harness energy from the photovoltaic effect or from sunlight to generate electricity. For example, a company involved in the production of solar panels may be categorized as having business activities related to Solar Energy Systems & Components. Solar panels consist of an arrangement of solar photovoltaic cells mounted in a</p> |

Global X Management Company (Europe) Limited

| | |
|---|--|
| | <p>framework for installation. Solar Power Production: Companies that generate and distribute electricity from light energy. Solar Technology: Companies that develop commercial and residential infrastructure, generators, and engines powered by solar energy, as well as residential and commercial scale batteries for electricity produced from solar power, and solar-powered charging systems for electric vehicles or other electric devices. Solar Installation, Integration & Maintenance: Companies that provide engineering and/or advisory services for the installation, integration, maintenance, and/or utilization of solar power at the residential, commercial, and industrial levels.</p> |
| Global X Wind Energy UCITS ETF | <p>The Fund promotes investment in companies that are positioned to benefit from further advances in the field of wind energy technology. The Fund will seek to replicate the performance of the Solactive Wind Energy v2 Index (the “Index”) to include securities issued by “Wind Energy Companies” as defined by Solactive AG, (the “Index Provider”) as those companies that derive at least 50% of their revenues, operating income, or assets from the following business activities: Wind Energy Systems: Companies involved in development, manufacturing, integration, and/or maintenance of turbine components and turbines that harness energy from the wind and convert it into electrical power. Wind Power Production: Companies that generate and distribute electricity from wind power.</p> <p>Wind Energy Technology: Companies that develop commercial and residential infrastructure and systems powered by wind energy, as well as residential and commercial scale batteries for electricity produced from wind power. Wind Power Integration & Maintenance: Companies that provide engineering and/or advisory services for the installation, maintenance, and/or utilization of wind energy at the residential, commercial, and industrial levels. In addition, companies identified by the Index Provider as having primary business operations in the business activities described above but that do not currently generate revenues (“Pre-Revenue Wind Energy Companies”), are eligible for inclusion in the Index if there are fewer than 25 eligible Wind Energy Companies. Pre-Revenue Wind Energy Companies are subject to an aggregate weight cap of 10% at each semi-annual rebalance.</p> |
| Global X AgTech & Food Innovation UCITS ETF | <p>The Fund promotes improved environmental impact for farming and more sustainable food systems by investment in AgTech & Food Innovation Companies that are positioned to benefit from further advances in the fields of agricultural technology (“AgTech”) and food innovation through replicating the Index. Specifically, the Index will include securities issued by “AgTech & Food Innovation Companies” as defined by Solactive AG, the Index Provider. “AgTech & Food Innovation Companies” are those companies that derive at least 50% of their revenues, operating income, or assets from the following business activities: Precision Agriculture: Precision agriculture utilises technology and data to optimise farming practices, minimising resource usage such as water, fertilizer, and pesticides through targeted application. By reducing input waste and environmental impact, precision agriculture promotes sustainability in farming while also contributing to biodiversity conservation and ecosystem health. Technologies are used to increase crop yields and reduce levels of traditional agricultural inputs (land, water, fertilizer, etc.) to grow crops more profitably/efficiently. Business activities include the development of Geographic Information System (“GIS”) software and hardware for GIS-based agriculture, precision weed control technologies, soil and water sensors, weather tracking, and satellite imaging. Protein & Dairy Alternatives: Protein and dairy alternative products offer sustainable options to traditional animal-based products, with lower environmental footprints in terms of land use, water consumption, and greenhouse gas emissions. By promoting plant-based proteins and non-dairy alternatives, individuals and industries can mitigate environmental impact and contribute to a more sustainable food system, addressing concerns related to deforestation, habitat destruction, and climate change. Food Waste Reduction: Food waste reduction strategies aim to minimise waste at various stages of the supply chain, from production and distribution to consumption, thereby conserving resources and reducing greenhouse gas emissions. Through improved harvesting techniques and technologies, storage methods, consumer education, and surplus food redistribution initiatives, food waste reduction efforts mitigate environmental impact, alleviate pressure on ecosystems, and contribute to a more sustainable and efficient food system. Robotics/Automation: Robotics and automation technologies streamline agricultural tasks through drones, autonomous vehicles, and artificial intelligence-driven systems, enhancing productivity, reducing labour costs, and optimising resource usage to foster sustainable farming practices with potentially lower environmental impacts. Controlled Environment Agriculture: Controlled environment agriculture involves growing crops indoors or in controlled settings, optimising conditions to enable year-round production, conserving resources, and offering opportunities for urban farming, thus promoting food security and reducing pressure on natural ecosystems. Agricultural Biotechnology: Biotechnology in agriculture utilises genetic engineering to improve crop traits, enhance yields, and bolster resistance to pests and diseases, potentially reducing the reliance on chemical inputs while addressing food security concerns. The Fund will seek to replicate the performance of the Index.</p> |

Global X Management Company (Europe) Limited

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund are:

- 1 the percentage of the eligible universe of companies screened out of the portfolio of the Fund out as a result of the application of the ESG screening criteria incorporated in the Index methodology; and
- 2 the percentage of the companies comprising the portfolio of the Fund which comply with the principles of the United Nations Global Compact.

A current list of applicable exclusion lists is maintained on the Index Provider's website at: <https://www.solactive.com/indices/?index=DE000SL0CZS9>.

The sustainability indicators of the Fund are considered on an ongoing basis and in particular at each rebalancing of the Index by continuous assessment of each Index constituent's annual reporting, and other available data to the Investment Manager's ESG screening provider.

The good governance practices for each of the entities in which the Fund invests are assessed by applying the following:

United Nations Global Compact Principles:

Each of the eligible companies for investment by the Fund are screened on a quarterly basis to assess whether each constituent complies with the principles of the United Nations Global Compact in order that the Fund will aim to invest only in companies that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption.

Controversial Products:

Each constituent is also reviewed on a quarterly basis for involvement in the production of controversial products. Controversial products are defined as products that pose a material risk due to a large portion of investors perceiving them as offensive, embarrassing, harmful, socially unacceptable, or ethically objectionable.

Exclusions:

Any existing or potential constituent of the Index which does not meet the labour, human rights, environmental, and anti-corruption standards as defined by the United Nations Global Compact Principles, or that breaches the established thresholds for involvement in controversial products, as of the quarterly review will be excluded from the Index and therefore not included in the Fund's investment universe.

The Investment Manager has adopted proxy voting policies and guidelines and has engaged a third party proxy solicitation firm, Glass Lewis & Co. ("Glass Lewis"), whose guidelines encourage the maximization of return for shareholders through identifying and avoiding financial, audit and corporate governance risks. Except in instances where the Investment Manager has provided Glass Lewis with different direction, Glass Lewis has agreed to vote proxies in accordance with recommendations developed by Glass Lewis and overseen by the Investment Manager.
