

This document is a Supplement to the Prospectus dated 26 March 2025 issued by Global X ETFs ICAV (the “ICAV”). This Supplement forms part of, and should be read in conjunction with, the Prospectus.

Investors' attention is drawn to the risk warnings contained in the section of the Prospectus entitled “Risk Factors” and, in particular, to the risk warnings contained in the section of this Supplement entitled “Risk Factors”.

Words and expressions defined in the Prospectus, unless the context otherwise requires, have the same meaning when used in this Supplement.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all Investors.

SUPPLEMENT

in respect of

GLOBAL X UK SUPERDIVIDEND UCITS ETF (the “Fund”)

a UCITS ETF Sub-Fund of the Global X ETFs ICAV

an open-ended Irish collective asset-management vehicle having registration number C435449 and established as an umbrella fund with segregated liability between sub-funds and authorised by the Central Bank of Ireland as a UCITS.

Dated 13 August 2025

The Directors of the ICAV, whose names appear in the Directory in the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this document is in accordance with the facts and does not omit anything likely to affect the import of such information.

THE FUND

Investment Objective

The investment objective of the Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the Solactive United Kingdom SuperDividend Index (the “**Index**”).

Investment Policy

In order to achieve this investment objective, the Fund will seek to replicate the performance of the Index, subject to the deduction of the TER and other expenses associated with operating the Fund as further described in the “Fees and Expenses” section of the Prospectus. It will do so by investing primarily in a portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index and in American Depository Receipts (“**ADRs**”) and Global Depository Receipts (“**GDRs**”) based on the securities in the Index. By holding each equity security in approximately the same proportion as its weighting in the Index, which weighting may exceed 5% per issuer between rebalancing dates and so the aggregate of holdings of issuers above 5% may exceed 40% and so, the Fund may have to avail of the additional issuer concentration limits which would allow investment of up to 20% of the Net Asset Value of the Fund in stocks issued by the same body.

The Fund is not classified as an Article 8 or Article 9 fund pursuant to SFDR, however, disclosure in accordance with the requirements of Article 6 of SFDR in relation to the integration of sustainability risks is set out in the Prospectus and also the Risk Factors section below. The investments underlying the Fund do not take into account the EU criteria for environmentally sustainable activities.

The Index tracks the performance of market-cap weighted companies that rank among the highest dividend yielding equity securities in the United Kingdom as defined by Solactive AG the provider of the Index (the “**Index Provider**”).

The investable universe is comprised of companies which meet minimum market capitalisation (500 million USD) on the respective selection day and trading criteria (an average value traded of at least 2.5 million USD over six months prior to and including the selection day) and a target minimum/maximum dividend yield, the level of which may vary depending on whether or not they are currently components of the Index. To be included within the investable universe, companies are also screened to confirm there has been no official announcement that dividend payments will be cancelled or substantially reduced in the future. Companies within the investable universe are ranked according to their dividend yield and are subsequently reviewed by the Index Provider to assess whether there was a semi-annual reduction in the dividend payment above the maximum reduction threshold (25% as at the date of the Supplement) specified in the Index Methodology (as defined below) (i.e. dividend stability filter) in order to determine whether they will be automatically selected for the Index or, in circumstances where the Index does not yet comprise 25 constituents, form part of a review pool from which the balance of the constituents will be selected. Companies within the review pool will be ranked in accordance with their indicative dividend yield, which is calculated by dividing the annualised most recent ordinary dividend payment of a company by the close price on the respective day on which the Index Provider conducts the review. Thereafter, the highest ranked companies of the review pool are selected as the balance of the constituents of the Index until it consists

of 25 constituents all of which are market-cap weighted with a 5% single issuer cap. Please see the link below to the Index Methodology for further details.

The Investment Manager uses a “passive” or indexing approach to try to achieve the Fund’s investment objective. The Fund does not try to “outperform” the Index and does not seek temporary defensive positions when markets decline or appear overvalued.

Where it is not possible or practicable for the Fund to invest directly in or continue to hold all of the component securities of the Index (for reasons such as, but not limited to, where this would involve difficulties or substantial costs, where one or more securities in the Index becomes temporarily illiquid or unavailable, or as a result of legal restrictions or regulatory limitations that apply to the Fund but not the Index) and/or where consistent with its investment objective, the Fund may also invest in the following additional assets subject to the conditions and within the limits laid down by the Central Bank:

- Depositary Receipts relating either to component securities of the Index or to equity securities of the type referred to above;
- FDIs – namely, total return “unfunded” OTC Swaps and exchange-traded equity futures – which may be used for investment purposes (such as gaining exposure to the Index and/or any particular constituents of the Index) in accordance with the terms set out in the sections entitled “Fund Investments”, “Unfunded OTC Swap Model” and Schedule II of the Prospectus. While the Fund may invest up to 100% of its Net Asset Value in total return “unfunded” OTC Swaps, it is not expected that this flexibility will be used. The Fund will only invest in FDIs as provided for in the RMP prepared by the Investment Manager in respect of the Fund and filed with the Central Bank;
- Equity securities which are not constituents of the Index, which, in the opinion of the Investment Manager, are expected to provide similar performance and risk characteristics to the Index constituent(s) which are not possible or practicable for the Fund to invest directly in or continue to hold; and
- Collective investments schemes that have a similar strategy to the Fund or allow similar exposure to the Index constituents.

The equity securities and FDI investments of the Fund will be listed, traded and dealt with on one or more of the Regulated Markets set out in Schedule 1 to the Prospectus.

The Fund may, in addition, employ other techniques relating to transferable securities, including entering into securities lending transactions, investing in repurchase and reverse repurchase transactions and collective investment schemes, for the purpose of efficient portfolio management only, in accordance with the terms set out in the section entitled **“Efficient Portfolio Management Techniques”** and Schedule III of the Prospectus. While the Fund may invest up to 100% of its Net Asset Value in repurchase and reverse repurchase transactions it is not expected that this flexibility will be used.

The maximum proportion of the Net Asset Value of the Fund that can be subject to securities lending is 50%. The proportion of the Net Asset Value of the Fund that will be subject to securities lending is expected to range from 0% to 50%.

The maximum proportion of the Net Asset Value of the Fund that can be subject to repurchase transactions is 20%. The proportion of the Net Asset Value of the Fund that will be subject to repurchase transactions is expected to be 0%.

The maximum proportion of the Net Asset Value of the Fund that can be subject to reverse repurchase transactions is 20%. The proportion of the Net Asset Value of the Fund that will be subject to reverse repurchase transactions is expected to be 0%.

The maximum proportion of the Net Asset Value of the Fund that can be subject to total return swaps is 20%. The proportion of the Net Asset Value of the Fund that will be subject to total return swaps is expected to be 0%.

As at the date of this Fund Supplement, to the extent the Fund undertakes securities lending, the Fund will receive 87% of the associated revenue generated from securities lending activities and the remaining 13% will be retained by the securities lending agent (representing the attendant direct and indirect operational costs and fees of the securities lending). In circumstances where the attendant direct and indirect operational costs and fees of the securities lending are less than 13% of the revenue generated from securities lending activities, the excess revenue will be returned to the Fund.

Base Currency

The Base Currency of the Fund is GBP.

Investment Manager

The Investment Manager of the Fund is Global X Management Company LLC.

There is no guarantee that the Fund will achieve its investment objective.

PROFILE OF A TYPICAL INVESTOR

A typical investor in the Fund would want to take a long or short-term exposure to the market covered by the Index and would be prepared to accept the medium level risks associated with an investment of this type, including the potential volatility of such market. Such an investor is also one that is able to assess the merits and risks of an investment in the Shares of the relevant Class of the Fund.

SHARE CLASSES

Only ETF Shares will be issued in respect of the Fund.

Details of the Classes available in the Fund, are set out below.

DIVIDENDS

Where the ICAV intends to declare dividends with respect to one or more Classes of the Fund, the proposed frequency of such dividend declarations shall be as set out in the table in the section entitled “*Share Classes*”.

It is not the current intention of the Directors to declare dividends in respect of the Classes identified as “accumulating” classes in this Supplement. The income and earnings and gains of the Funds will be accumulated and reinvested. Any change to this dividend policy shall be set out in an updated version of the Supplement and notified to the Shareholders in advance.

It is intended to declare dividends in respect of the Classes identified as “distributing” classes in this Supplement. Distributions in respect of these Classes will be declared on each Distribution Date in each year provided that if such dates are not Business Days, the declaration date will be the Business Day immediately following such date respectively. The distribution may comprise net income (if any) of the Fund.”

The Distribution Date for this Fund will be as noted on the distribution calendar available at <https://globalxetfs.eu>.

Payments

With the authorisation and upon the instruction of the Common Depositary's Nominee, any dividends declared and any liquidation and mandatory redemption proceeds are paid by the ICAV or its authorised agent (for example, a paying agent) to the applicable ICSD. Investors, where they are Participants, must look solely to the applicable ICSD for their share of each dividend payment or any liquidation or mandatory redemption proceeds paid by the ICAV or, where they are not Participants, they must look to their respective nominee, broker or Central Securities Depositary (as appropriate, which may be a Participant or have an arrangement with a Participant of the applicable ICSD) for any share of each dividend payment or any liquidation or mandatory redemption proceeds paid by the ICAV that relates to their investment.

Investors shall have no claim directly against the ICAV in respect of dividend payments and any liquidation and mandatory redemption proceeds due on Shares represented by the Global Share Certificate and the obligations of the ICAV will be discharged by payment to the applicable ICSD with the authorisation of the Common Depositary's Nominee.

DEALING IN SHARES OF THE FUND

Only the ETF Shares issued in respect of this Fund will be listed and/or traded on the Relevant Stock Exchanges. It is envisaged that ETF Shares will be bought and sold by private and institutional investors in the secondary market.

Only Authorised Participants may subscribe for and redeem ETF Shares in the Fund directly with the ICAV in accordance with the section of the Prospectus entitled "**Subscriptions and Redemptions**" having regard to the information set out below:

Business Day	A day on which the New York Stock Exchange and London Stock Exchange is open for normal business.
Class Currency	The dealing currency and the currency of denomination of the relevant Class.
Dealing Day	On each Business Day.
Initial Offer Period	The Initial Offer Period shall only apply to unlaunched Classes and shall commence at 9:00 a.m. (Dublin time) on 14 August 2025 and shall end at 3 p.m. (Dublin time) on 13 February 2026 or such other time as the Directors may determine.
Initial Offer Price	The price per Share is expected to be approximately GBP 15, or its equivalent in the Class Currency. However, the actual initial price per ETF Share will depend on the actual cost to the ICAV of purchasing the relevant Investments (please see the definition of " Duties and Charges " in the Prospectus). Details of the Initial Offer Price will be available from the Administrator and on https://globalxetfs.eu
Minimum Redemption Amount	1 Creation Unit of 10,000 Shares or its cash equivalent
Minimum Subscription Amount	1 Creation Unit of 10,000 Shares or its cash equivalent

Settlement Time	Settlement of subscriptions shall generally occur within two Business Days after the relevant Dealing Day (unless otherwise stipulated by the Manager or its delegate) and in any event will occur within a maximum of ten Business Days. Subscription Fee	None
Redemption Fee	None
Trade Cut-Off Time	3.00 p.m. (London time) on the relevant Dealing Day or later time as may be determined by the Manager or the Investment Manager at their discretion with prior notice to the Authorised Participants, which is the cut-off time in respect of any Dealing Day for receipt of applications for subscriptions and redemptions in the Fund. The Trade Cut-Off Time for this Fund reflects that some, or all, of the Fund's underlying assets are traded in time zones earlier than the European time zone.
Valuation Point	4.00 p.m. New York time on the relevant Dealing Day

FEES AND EXPENSES

A TER will be paid out of the assets of each Class to the ICAV. The TER for each Class is set out under the heading "TER" in the table included under the heading "**Share Classes**".

This section should be read in conjunction with the section headed "**Fees, Costs and Expenses**" in the Prospectus.

RISK FACTORS

Investment in the Fund carries with it a degree of risk including, but not limited to, the risks described in the "**Risk Factors**" section of the Prospectus including particularly Securities Lending Risk, Concentration Risk, Credit Risk, Risk of Investing in the United Kingdom and Non-Diversification Risk.

Given the investment strategy of the Fund and its risk profile, the likely impact of sustainability risks on the Fund's returns is expected to be low.

Country risk. The value of a Fund's assets may be subject to uncertainties such as changes in a country's government policies, taxation, restrictions on foreign investment, currency decisions, applicable laws and regulations, or any natural disasters or political upheaval, will weaken a country's securities markets.

High Dividend Yielding Stocks Risk: The Fund may invest in securities that typically pay a higher level of income. There is no guarantee that companies will continue to pay dividends at current levels or at all. Dividends are subject to the company's financial health, profitability and discretion of the board of directors. Changes in the dividend policies of companies within the portfolio can impact Fund returns. The value of high dividend-yielding securities can be volatile and fluctuate due to market conditions, economic developments, and investor sentiments.

Integration of Sustainability Risks: The Fund seeks to replicate the composition of the index and, in doing so, will invest primarily in a portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index. The Index is created and maintained by a third-party index provider and as the strategy of the Fund is to replicate the performance of the Index, changes to the portfolio of the Fund are driven by changes to the Index in accordance with its published methodology rather than by an active selection of stocks by the Investment Manager. Accordingly, the Investment Manager does not exercise discretion to actively select/deselect stocks. Therefore, there is no integration of Sustainability Risks into the Investment Manager's investment process. For further information on the Fund's approach to sustainability risks in accordance with Article 6 of SFDR, please refer to the Prospectus.

RISK MANAGEMENT

The Fund's global exposure, being the incremental exposure and leverage generated by the Fund through its use of FDI, shall be calculated on at least a daily basis using the commitment approach and, in accordance with the requirements of the Central Bank, may at no time exceed 100% of the Fund's Net Asset Value. As noted in the "Investment Policy" section above, the Fund's use of FDI is an ancillary element of the investment policy in that it is an alternative means of gaining exposure to the Index, or one or more of the constituents of the Index, in circumstances where direct investment in the constituents of the Index is not possible, practicable or desirable. Regardless of whether exposure to the underlying constituents is obtained by direct investment in the constituents, or by gaining exposure to the constituents through the use of FDI, the same notional value shall be committed to the investment by the Fund. Accordingly, it is not expected that the Fund will be leveraged.

THE INDEX

General Description

The Index tracks the performance of market-cap weighted companies that rank among the highest dividend yielding equity securities listed on an exchange located in the United Kingdom. The Index is maintained by Solactive AG.

The investable universe is comprised of securities included in the Reference Index. Based on the index universe, the Index is comprised of companies which meet minimum market capitalisation (at least 500 million USD), trading criteria (an average value traded of at least 2.5 million USD) and a target dividend yield of at least 4% on the selection day. To be included within the Index, companies must have a dividend yield not exceeding 20% and the estimated dividend per share for the following year must be at least 0.75 times the dividend per share paid over the last 12 months. If a security is not included in the Index yet, its last year next semi-annual dividend per share payment must be positive. Companies within the investable universe are ranked according to their dividend yield and the top 25 securities are selected. If a current Index constituent ranks within the top 30 securities it remains in the Index. In circumstances where the

Index does not yet comprise 25 constituents, companies within the review pool will be ranked in accordance with their indicative dividend yield, which is calculated by dividing the annualised most recent ordinary dividend payment of a company by the close price on the respective day on which the Index Provider conducts the review. Thereafter, the highest ranked companies of the review pool are selected as the balance of the constituents of the Index until it consists of 25 constituents all of which are market-cap weighted with a 5% single issuer cap.

Index Rebalancing

The Index shall be rebalanced on a semi-annual basis.

Investors should note that the respective weights of each of the constituents of the Index are expected to fluctuate in-between the periodic rebalance dates of the Index. Please see the Prospectus section entitled “*Circumstances where the weighting of an Index constituent exceeds the applicable concentration limits prescribed by the UCITS Regulations*” for details of the procedure to be adopted when the weighting of any constituent of the Index exceeds the permitted investment restrictions.

The information set out above is a summary of the principal features of the Index and does not purport to be an exhaustive description. Further information can be found in <https://www.solactive.com/downloads/Guideline-Solactive-United-Kingdom-SuperDividend-Index.pdf> (the “**Index Methodology**”) which is available, along with the constituents and weights of the Index at: https://www.solactive.com/wp-content/uploads/solactiveip/en/Factsheet_DE000SL0NST9.pdf.

Index Provider

The Benchmark Administrator is Solactive AG and the Index is calculated by Solactive AG.

The Index is sponsored by Solactive AG as the Index Provider, which is an organisation that is independent of the Fund and Global X Management Company LLC, the Investment Manager for the Fund. The Index Provider determines the relative weightings of the securities in the Index and publishes information regarding the market value of the Index.

TAXATION

German Investment Tax Act

The ICAV seeks to maintain “equity fund” status for the Fund pursuant to Section 2 para. 6 and 7 of the German Investment Tax Act 2018.

Investors should consult their own professional advisers as to the implications of the Fund maintaining “equity fund” status pursuant to the German Investment Tax Act 2018.

As at the date of this Fund Supplement, at least 51% of the Fund’s assets will be continuously invested in equity assets as defined in Section 2. para. 8 of the German Investment Tax Act 2018.

DISCLAIMERS

The ICAV is required to provide details of the Index Provider's website to enable investors to obtain further details of the Index (including its constituents). Neither the ICAV nor the Investment Manager has any responsibility for the contents of such website and are not involved in any way in sponsoring, endorsing or otherwise involved in the establishment, maintenance or contents of the website.

Solactive AG is a leading company in the structuring and indexing business for institutional clients. Solactive AG runs the Solactive index platform. Solactive indices are used by issuers worldwide as underlying indices for financial products. Solactive does not sponsor, endorse or promote any Fund and is not in any way connected to it and does not accept any liability in relation to their issue, operation and trading.
