Global X Stablecoin & Tokenisation UCITS ETF (TKNX)

A fund that seeks to provide exposure to companies involved in the development, adoption and enablement of tokenisation and stablecoin-related technologies.

For Professional Investors only

INTRODUCTION

Tokenisation refers to the process of converting ownership rights in real-world assets, such as real estate, bonds, or works of art, into digital tokens recorded and managed on a blockchain or distributed ledger.¹ By enabling fractional ownership and near-instant settlement, tokenisation has the potential to broaden market access, simplify investment, and unlock liquidity from traditionally illiquid assets.²

Stablecoins are a complementary innovation within this ecosystem. These digital tokens are designed to maintain a stable value relative to a reference asset, such as the U.S. dollar, and are increasingly being explored as a means of addressing long-standing inefficiencies in financial markets.³ By facilitating near-instant, cross-border settlement without relying on traditional banking infrastructure, stablecoins could play a critical role in enabling the efficient exchange of tokenised assets.⁴

TKNX LN is designed to provide exposure to companies involved in the development, adoption, and enablement of stablecoin and tokenisation-related technologies. This includes companies that derive economic exposure from tokenised asset markets, including trading/distribution venues, tokenisation platforms, token distribution networks, stablecoin issuance, and the infrastructure supporting digital payments, settlement, and custody.

DID YOU KNOW?

- In August 2025, over US\$10 billion in payments were made using stablecoins instead of fiat currency, with total stablecoin payments forecast by Bloomberg to reach US\$122 billion by the end of 2026.⁵
- Major financial firms are piloting tokenised funds, and some payment services offer stablecoin-based settlement systems.⁶
- The GENIUS Act, passed in the U.S. in June 2025, set strict rules for stablecoins - requiring full backing by high-quality liquid assets, timely redemption and disclosure, and banning interest payments - all aimed at providing strong consumer protection and transparency.⁷
- Tokenised U.S. Treasuries have grown to nearly US\$10 billion on-chain - still a small fraction of the c.US\$30 trillion U.S. Treasury market - highlighting early adoption and potential long-term growth.⁸

Capital at Risk. All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed.

FUND DETAILS

Inception Date	14 April 2026

SFDR Classification	Article 6
Underlying Index	Mirae Asset Stablecoins and Tokenisation UCITS Index

Registered Countries:

Austria, Denmark, Finland, France, Germany, Ireland, Italy, Luxembourg, Netherlands, Norway, Spain, Sweden, Switzerland, United Kingdom, Singapore [Restricted]

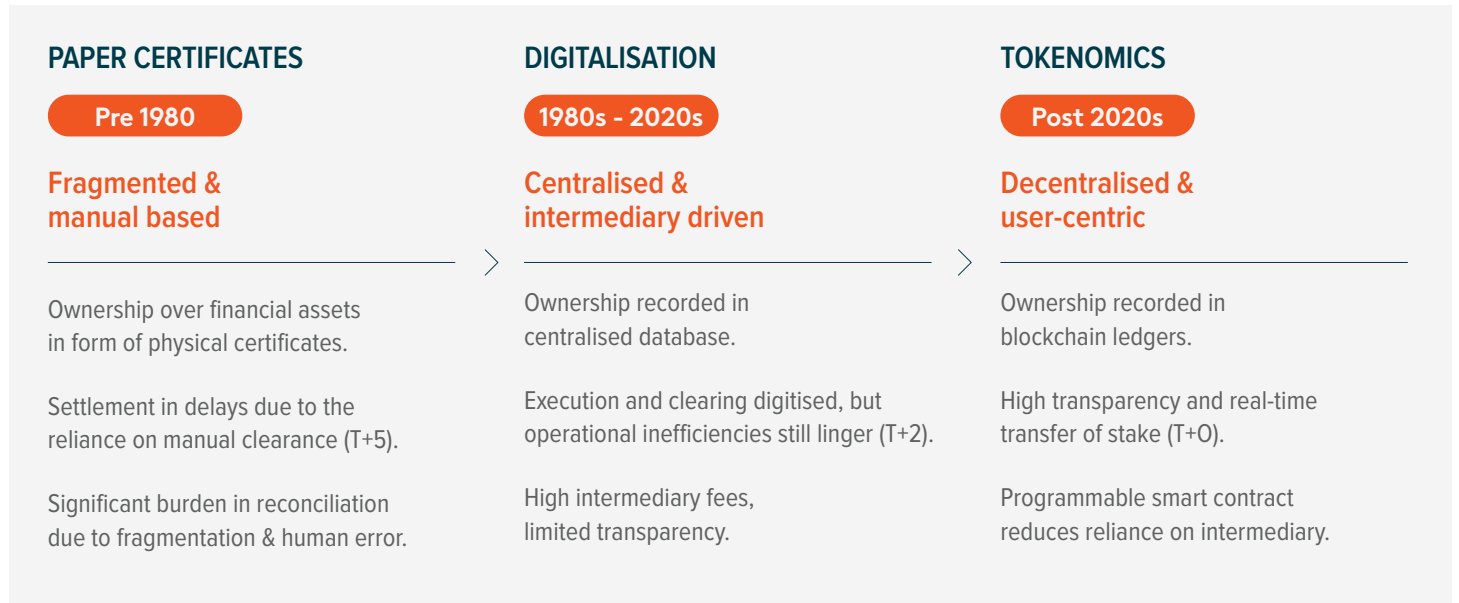

FUND INVESTMENT APPROACH

- The Global X Stablecoin & Tokenisation UCITS ETF (TKNX) seeks to provide exposure to companies involved in the development, adoption and enablement of tokenisation and stablecoin-related technologies. This includes companies that derive economic exposure from tokenised asset markets, including trading/distribution venues, asset tokenisers, token distributors, stablecoin issuers, and infrastructure providers for payment, settlement and custody.
- Mirae Asset Global Indices has identified the following four sub-themes that aim to collectively capture the most relevant themes from the Stablecoin and Tokenisation ecosystem:
 - Token Distributors** - Exchanges/brokerages facilitating tokenised asset trading, or firms holding a significant share of corporate reserves in programmable tokens.
 - Asset Tokenisers** - Companies managing tokenised assets or offering tokenisation services.
 - Stablecoin Issuers** - Companies engaged in issuing fiat-backed stablecoins
 - Infrastructure** - Companies developing infrastructure for token-based payments, settlements, stablecoin-related activities, and/or providing institutional-grade digital-asset custody.
- Holdings are separated into Disruptors and Adapters. **Disruptors** are companies whose core business is next-generation financial technology - including blockchain, tokenisation, and stablecoin issuance - driving structural change in finance. **Adapters** are established firms integrating these technologies into existing models to expand their businesses and unlock new potential growth.
- The index targets 30 holdings, selected as follows: top 20 securities from the **Disruptors** category and the top 10 securities from the **Adapters** categories.
- Constituents are weighed according to a modified market capitalisation. For securities classified as **Disruptors**, individual weights are capped at 8%. For securities classified as **Adapters**, individual weights are capped at 4%, and subject to an aggregate cap of 30% for the category.
- The index is reconstituted and rebalanced on a quarterly basis.

TOKENISATION IS NOT A NEW CONCEPT

Disclosures

The Global X UCITS ETFs are regulated by the Central Bank of Ireland.

This is a marketing communication. Please refer to the relevant prospectus, supplement, and the Key Information Document (“KID”) of the relevant UCITS ETFs before making any final investment decisions. Investors should also refer to the section entitled “Risk Factors” in the relevant prospectus of the UCITS ETFs in advance of any investment decision for information on the risks associated with an investment in the UCITS ETFs, and for details on portfolio transparency. The relevant prospectus and KID for the UCITS ETFs are available in English at www.globalxetfs.eu/funds.

Investment in the UCITS ETFs concern the purchase of shares in the UCITS ETFs and not in a given underlying asset such as a building or shares of a company, as these are only the underlying assets that may be owned by the UCITS ETFs.

A UCITS ETF's shares purchased on the secondary market cannot usually be sold directly back to a UCITS ETF. Investors must buy and sell shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying shares and may receive less than the current net asset value when selling them. Changes in exchange rates may have an adverse effect on the value price or income of the UCITS ETF. Past performance of a UCITS ETF does not predict future returns. Future performance is subject to taxation which depends on the personal situation of each investor, and which may change in the future. Neither past experience nor the current situation are necessarily accurate guides to the future growth in value or rate of return of a UCITS ETF. Investment may be subject to sudden and large falls in value, and, if it is the case, the investor could lose the total value of the initial investment. Income may fluctuate in accordance with market conditions and taxation arrangements. The difference at any one time between the sale and repurchase price of a share in the UCITS ETF means that the investment should be viewed as medium term to long term.

Any investment in a UCITS ETF may lead to a financial loss. The value of an investment can reduce as well as increase and, therefore, the return on the investment will be variable. Global X ETFs ICAV is an open-ended Irish collective asset management vehicle issuing under the terms of its prospectus and relevant supplements as approved by the Central Bank of Ireland and is the issuer of certain of the ETFs where stated.

Global X ETFs ICAV II is an open-ended Irish collective asset management vehicle issuing under the terms of its prospectus and relevant supplements as approved by the Central Bank of Ireland and is the issuer of certain of the ETFs where stated.

Communications issued in the European Union relating to Global X UCITS ETFs are issued by Global X Management Company (Europe) Limited (“GXM Europe”) acting in its capacity as management company of Global X ETFs ICAV. GXM Europe is authorised and regulated by the Central Bank of Ireland. GXM Europe is registered in Ireland with registration number 711633.

Communications issued in the United Kingdom and Switzerland relating to Global X UCITS ETFs are issued by Global X Management Company (UK) Limited (“GXM UK”), which is authorised and regulated by the Financial Conduct Authority. The registered office of GXM UK is 77 Coleman St, London EC2R 5BJ. Information about GXM UK can be found on the Financial Services Register (register number 965081).

Information for Investors in the United Kingdom

Please refer to the relevant prospectus, supplement, and the Key Investor Information Document (“KIID”) of the relevant UCITS ETFs before making any final investment decisions. These are available in English at www.globalxetfs.eu. The Financial Ombudsman Service is unlikely to consider complaints relating to the ETF and any claims for losses relating to the manager and the Depositary of the ETF are unlikely to be covered under the Financial Services Compensation Scheme.
